* Hereinafter, data for January-March 2020-2021 are provided with clarifications.

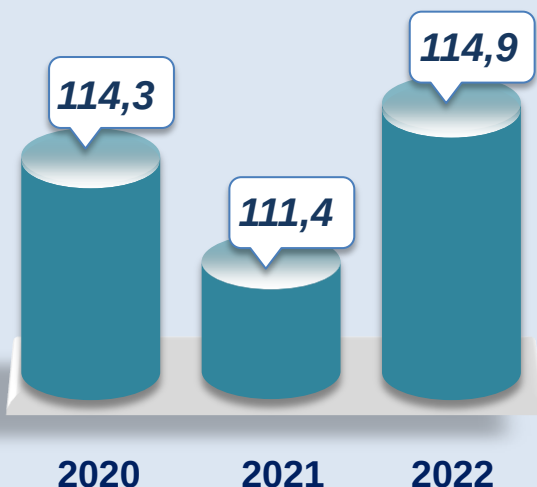

PRODUCTION OF GROSS DOMESTIC PRODUCT

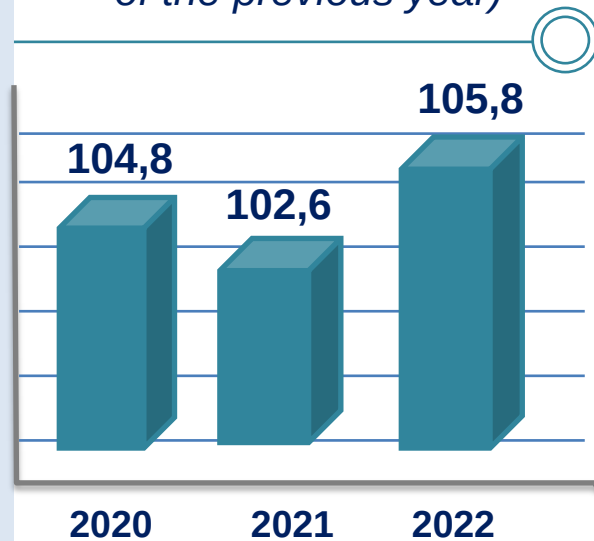

For reference: in January-March 2022, the official exchange rate of the US dollar against the soum averaged 10 965.8 soums, in January-March 2021 – 10 506.1 soums, and in January-March 2020 – 9 529.6 soums.

At the same time, the GDP deflator index increased to 114.9% after 111.4% in January-March 2021. In the same period of 2020, the GDP deflator index amounted to 114.3%.

GDP deflator index for January-March 2020-2022 (in % to the corresponding period of last year)

GDP growth rates for January -March 2020-2022 (in % to the corresponding period of the previous year)

In January-March 2022, GDP growth accelerated to 5.8% against 2.6% in January-March 2021 and 4.8% in January-March 2020.

PRODUCTION OF GROSS DOMESTIC PRODUCT

GDP

GDP – is one of the most important indicators of the System of National Accounts, characterizing the final result of the production activity of resident economic units, which is measured by the value of goods and services produced by these units for final use.

The index of physical volume (real growth rates) of GDP is calculated as the ratio of the GDP of the reporting period, calculated at constant prices, i.e. in prices of the corresponding period of the previous year (real GDP) to GDP in current prices of the corresponding period of the previous year.

The GDP deflator index characterizes the average change in prices in the economy and is calculated as the ratio of nominal GDP (GDP of the reporting period at current prices) to real GDP.

System of National Accounts 2008

PRODUCTION OF GROSS DOMESTIC PRODUCT

As can be seen from the infographic below, in January-March 2022, GDP per capita growth in real terms amounted to 3.7% against an increase of 0.6% in January-March 2021 and 2.8% in January-March 2020.

collection and disposal

In the industry, there is an increase in value added by 5.7%. The positive dynamics in this industry is mainly due to an increase in the value added of the mining industry and quarrying by 0.8% (in January-March 2021 – an increase of 2.3%, in January-March 2020 – a decrease of 13.1%) and manufacturing industry by 5.9% (in January-March 2021 - by 5.8%, in January-March 2020 – by 6.5%). The electricity supply, gas supply, steam and air conditioning industry also showed a positive growth of 15.5% against the growth of 6.6% in January-March 2021 and 7.9% in January-March 2020. In terms of added value of water supply, sewerage, waste collection and disposal, a decrease of 17.2% was noted (in January-March 2021 - an increase of 0.1%, in January-March 2020 - a decrease of 16.2%).

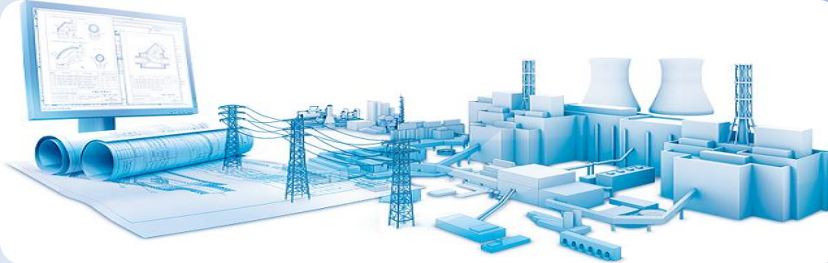

GROSS VALUE ADDED OF THE INDUSTRY

Dynamics of the gross value added of the industry for January-March 2020-2022

	2020		2021		2022	
	<i>billion soums</i>	<i>growth rates, %</i>	<i>billion soums</i>	<i>growth rates, %</i>	<i>billion soums</i>	<i>growth rates, %</i>

Road transport services

Pipeline transport services

Railway transport services

Auxiliary transport activities

Air transport services

According to the results of January-March 2022, the share of **transportation and storage** in the GDP of the Republic of Uzbekistan amounted to 5.8%.

In the structure of the gross value added of the transportation and storage industry, the largest share fell on road transport - 59.2% (in January-March 2021 - 59.7%, in January-March 2020 - 51.6%).

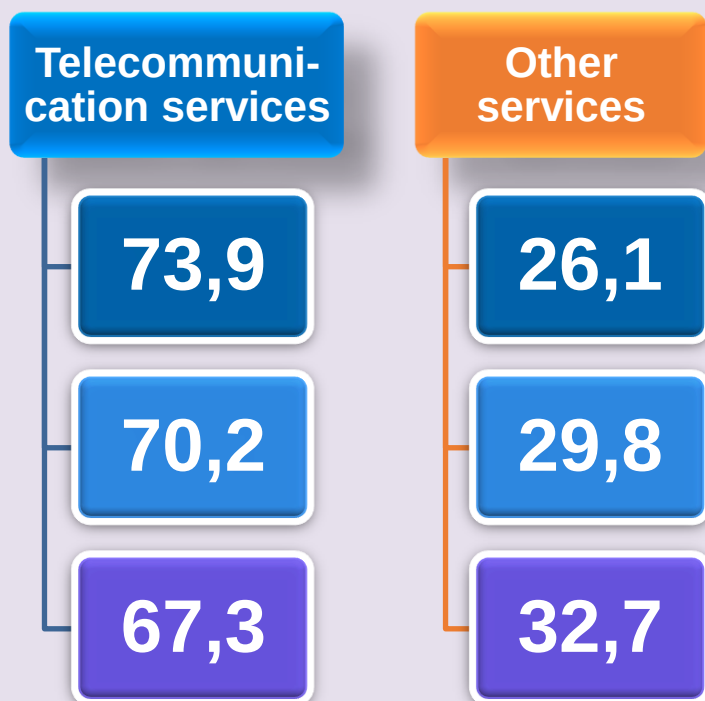

Pipeline transport amounted to 11.5% (in January-March 2021 - 14.9%, in January-March 2020 - 19.4%), railway transport - 12.1% (in January-March 2021 - 13.1%, in January-March 2020 - 13.5%), auxiliary transport activities - 12.3% (in January-March 2021 - 9.7%, in January-March 2020 - 9.6%), air transport - 4.9% (in January-March 2021 - 2.6%, in January-March 2020 - 5.9%) of the total value added of this industry.

GROSS VALUE ADDED IN THE INFORMATION AND COMMUNICATIONS INDUSTRY

The structure of the gross value added of information and communication for January-March 2020-2022 (in % of total)

In January-March 2022, the share of information and communications in the country's economy amounted to 2.2% (in January-March 2021 - 2.0%).

In the value added structure of this industry, the main share fell on telecommunications services (wire and mobile communication services, the Internet, etc.) and amounted to 67.3% (70.2% in January-March 2021).

The remaining 32.7% of the value added (in January-March 2021 - 29.8%) created in this industry falls on other areas (publishing, computer programming, programming and broadcasting, etc.).

GROSS VALUE ADDED IN THE INFORMATION AND COMMUNICATION TECHNOLOGY SERVICES INDUSTRY

In January-March 2022, the share of ICT services in the country's economy amounted to 2.0% (in January-March 2021 - 1.8%, January-March 2020 - 1.7%).

The added value of ICT services consists of communication services - 72.8%, computer programming, consulting and other related services - 13.6%, data hosting and processing services, Web portals - 6.0%, repair of computers and communication equipment - 4.8%, software release - 2.8%.
