

**STATISTICS AGENCY
UNDER THE PRESIDENT
OF THE REPUBLIC OF UZBEKISTAN**

PRODUCTION OF GROSS DOMESTIC PRODUCT OF THE REPUBLIC OF UZBEKISTAN

FOR JANUARY-SEPTEMBER 2024

(preliminary data)

Dynamics of Gross Domestic Product (GDP) of the Republic of Uzbekistan¹, January-September

■ GDP volume, *billion soums* —●— GDP growth rate, in % to the corresponding period of the previous year

According to the preliminary estimate, in January-September 2024, the GDP of the Republic of Uzbekistan in current prices amounted to **1 015 331.8** billion soums and, compared to January-September 2023, increased in real terms by **6.6 %**. The GDP deflator index, in relation to prices in January-September 2023, amounted to **113.1 %**.

Dynamics of the GDP deflator index, in % to the corresponding period of the previous year

✓ **The index of physical volume (real growth rate) of GDP** is calculated as the ratio of the GDP of the reporting period, calculated in constant prices, i.e. in the prices of the corresponding period of the previous year (real GDP) to the GDP in current prices of the corresponding period of the previous year.

✓ **Gross domestic product (GDP)** is one of the most important indicators of the System of National Accounts (SNA), characterizing the final result of the production activity of resident economic units, which is measured by the value of goods and services produced by these units for final use.

¹ Hereinafter the data is presented for January-September 2020-2024, including the non-observable economy.

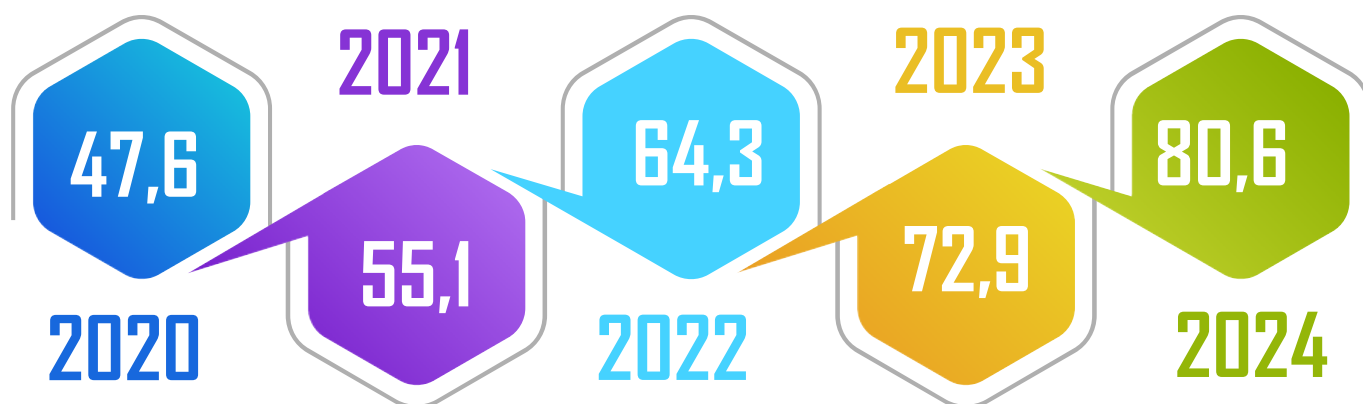

Dynamics of GDP of the Republic of Uzbekistan,

January-September, at current prices, trillion soums

2020	253,9	187,7	31,6
2021	314,7	229,7	37,8
2022	369,8	289,5	48,5
2023	429,3	372,7	40,6
2024	511,2	457,9	46,2
	Production of goods	Services sector	Net taxes on products

Dynamics of GDP of the Republic of Uzbekistan,

January-September, billion US dollars

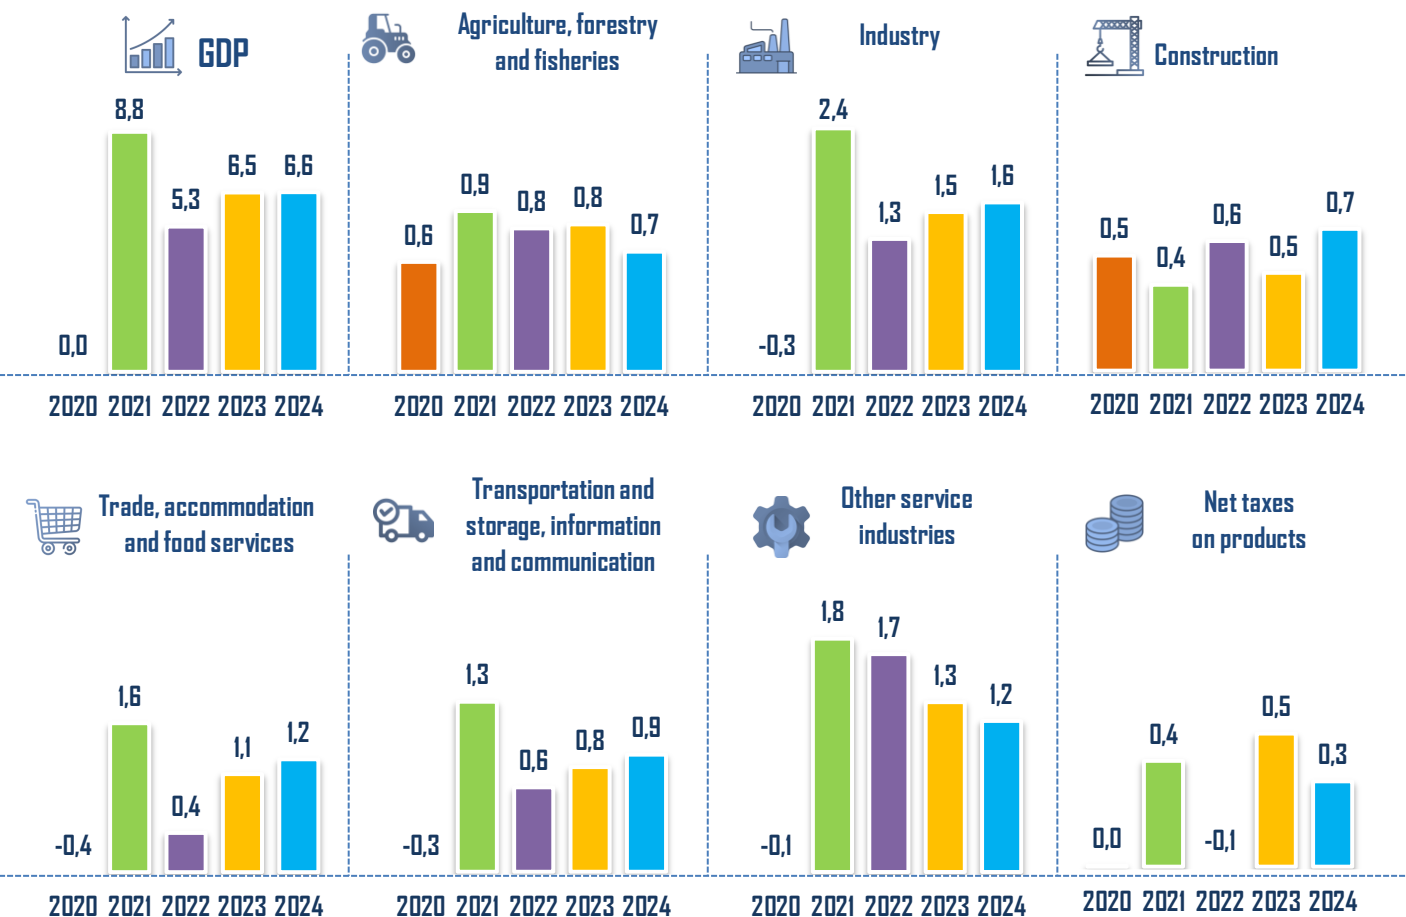

For reference: in January-September 2024, the official exchange rate of the US dollar against the sum averaged **12 594.9** soums, in January-September 2023 – **11 556.2** soums, in January-September 2022 – **11 009.3** soums, in January-September 2021 – **10 565.5** soums, in January-September 2020 – **9 940.9** soums.

When calculated in US dollars at the average exchange rate for the reporting period, nominal GDP amounted to **80 614.8** million US dollars.

In January-September 2024, a positive contribution to GDP growth was made by the agriculture, forestry and fisheries sectors - **0.7 p.p.**, industry - **1.6 p.p.**, construction - **0.7 p.p.** and the service sector - **3.3 p.p.** Due to the growth of net taxes on products, GDP increased by **0.3 p.p.**

Dynamics of the contribution of industries to GDP growth,

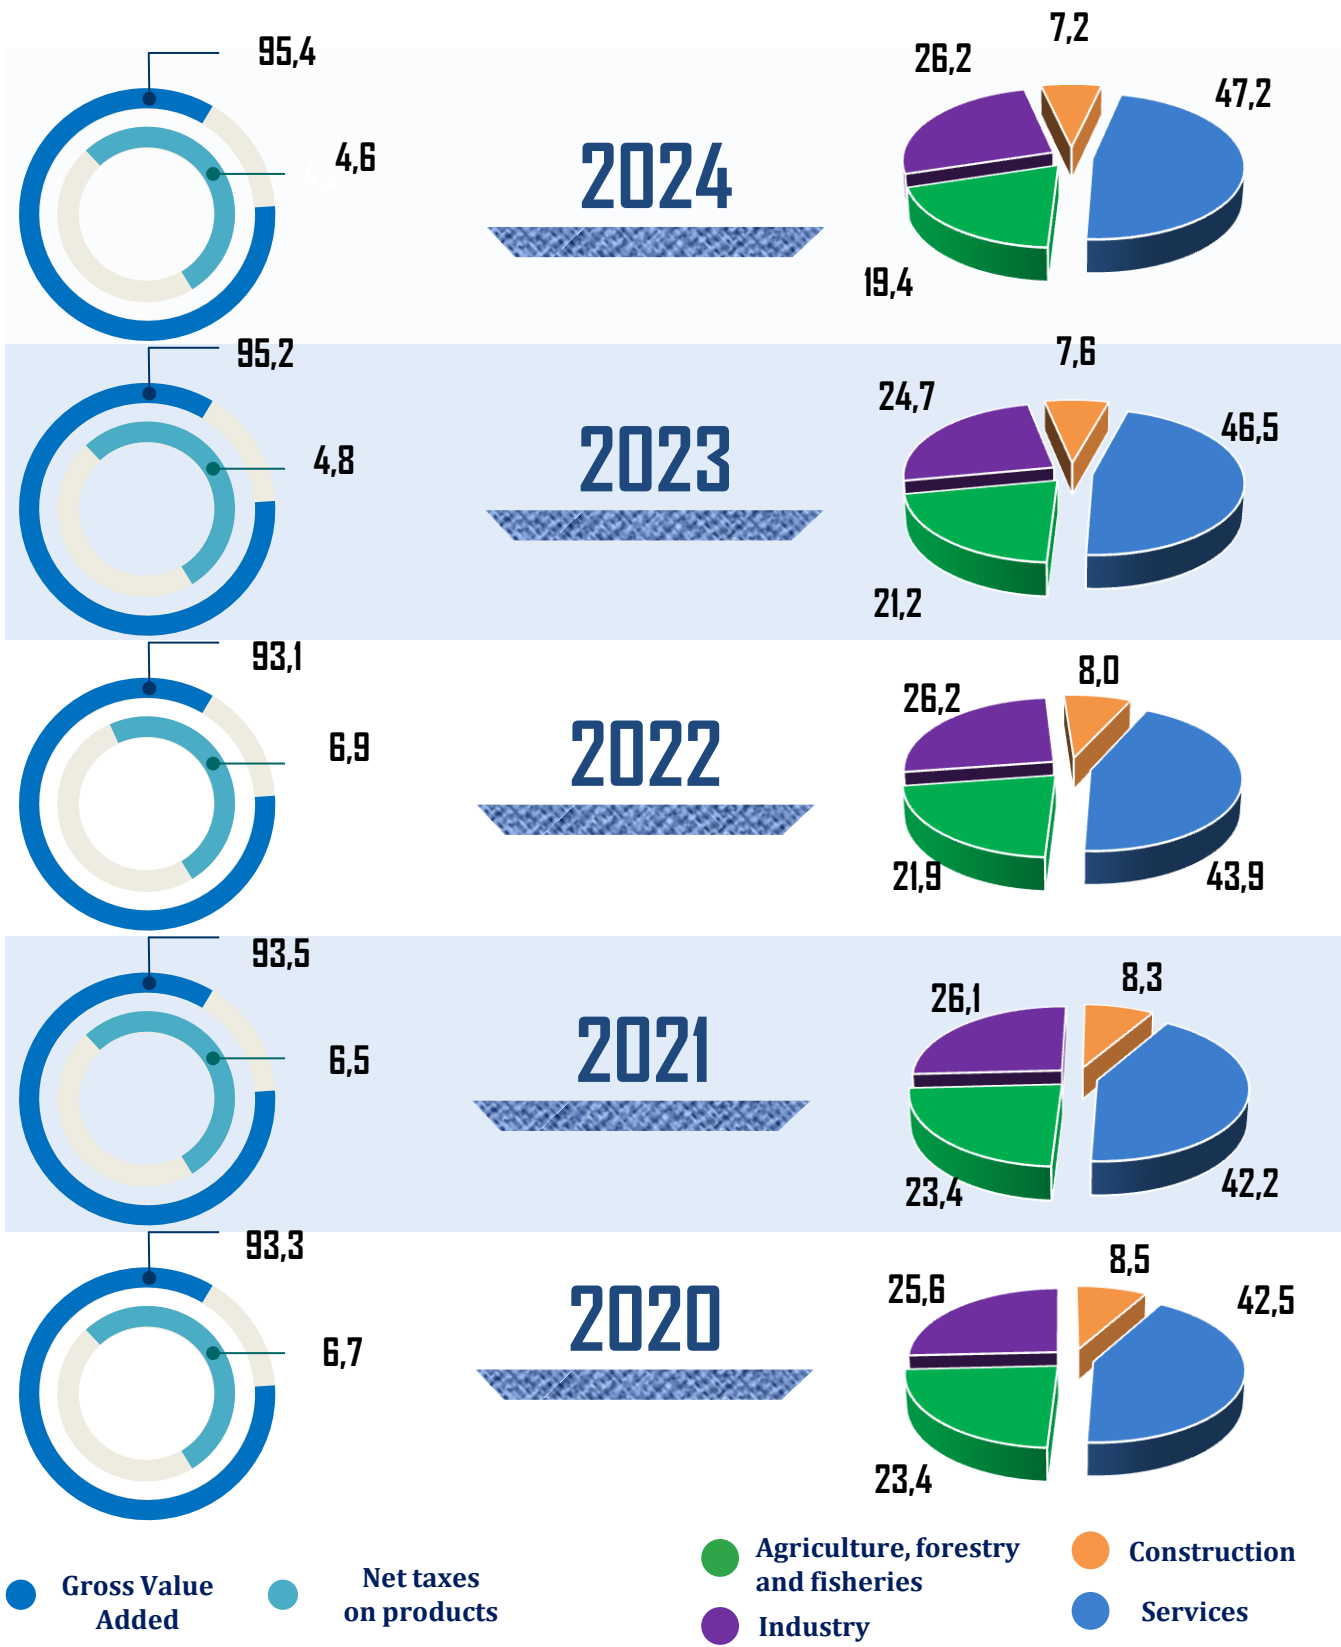

January-September, in % of total

Gross value added created by all sectors of the economy amounted to **95.4 %** of the total GDP and increased by **6.6 %** (contribution to GDP growth - **6.3 p.p.**). Net taxes on products in the structure of GDP amounted to **4.6 %** and, compared to January-September 2023, they increased by **6.6 %** (contribution to GDP growth - **0.3 p.p.**).

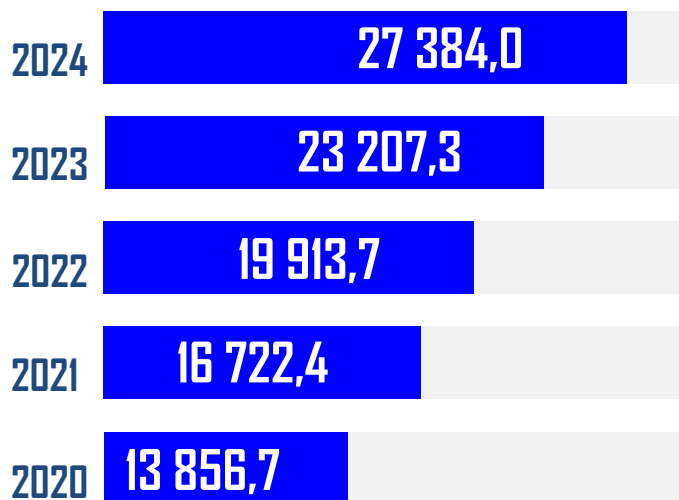

According to the results of January-September 2024, minor changes were noted in the sectoral structure of GDP. Thus, the share of the service sector in the sectoral structure of GDP (GVA) increased from **46.5 %** to **47.2 %**, industry - from **24.7 %** to **26.2 %**, while the share of agriculture, forestry and fisheries decreased from **21.2 %** to **19.4 %**, construction - from **7.6 %** to **7.2 %**.

GDP structure by types of economic activity,
January-September, in % of total

GDP per capita,

January-September, at current prices, thousand soums

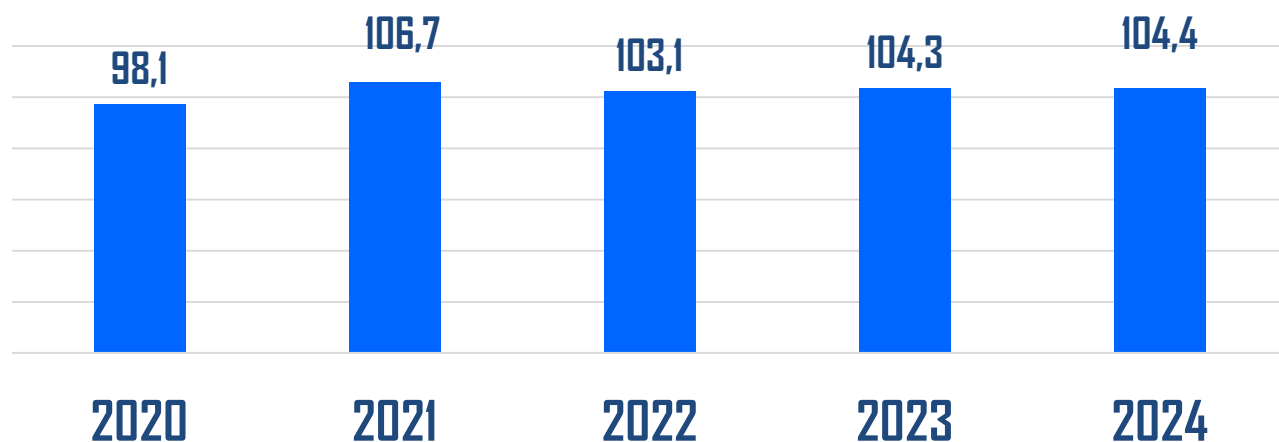

For reference: the average permanent population of the Republic of Uzbekistan was: in January-September 2020 – **34 144.2** thousand people, January-September 2021 – **34 819.1** thousand people, January-September 2022 – **35 546.2** thousand people, January-September 2023 – **36 312.4** thousand people, January-September 2024 – **37 077.6** thousand people.

In January-September 2024, GDP per capita at current prices amounted to **27 384.0** thousand soums (or, in equivalent, **2 174.2** US dollars).

Growth (decrease) rate of GDP per capita,

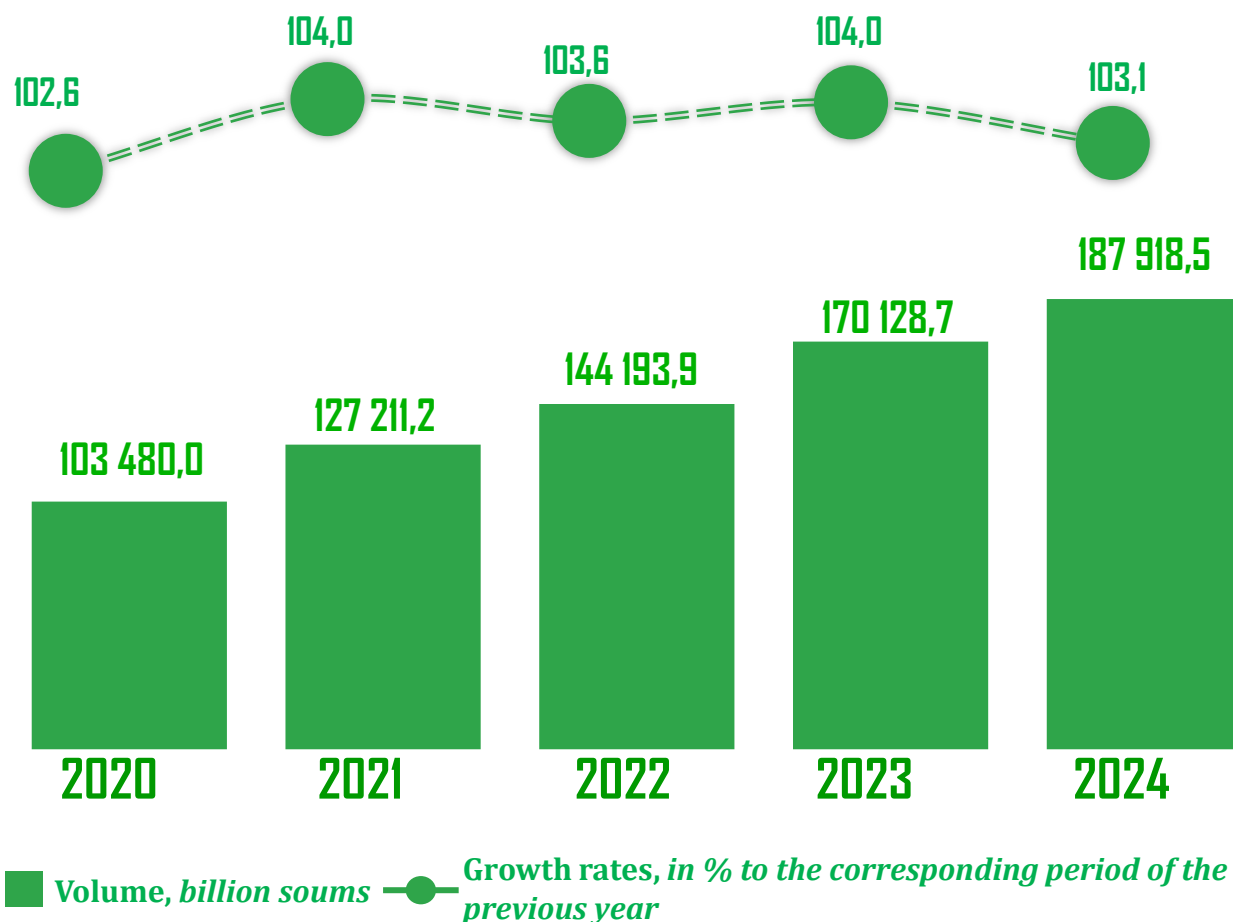

January-September, in % of the corresponding period of the previous year

As can be seen from the presented infographics, in January-September 2024, GDP per capita growth in real terms, compared to January-September 2023, amounted to **4.4** %, and compared to January-September 2020, it amounted to **19.7** %.

✓ **GDP (GRP) per capita** is determined by dividing the total GDP (GRP) at current prices by the average population of the country (region) for a certain period of time.

Gross value added of agriculture, forestry and fisheries, January-September

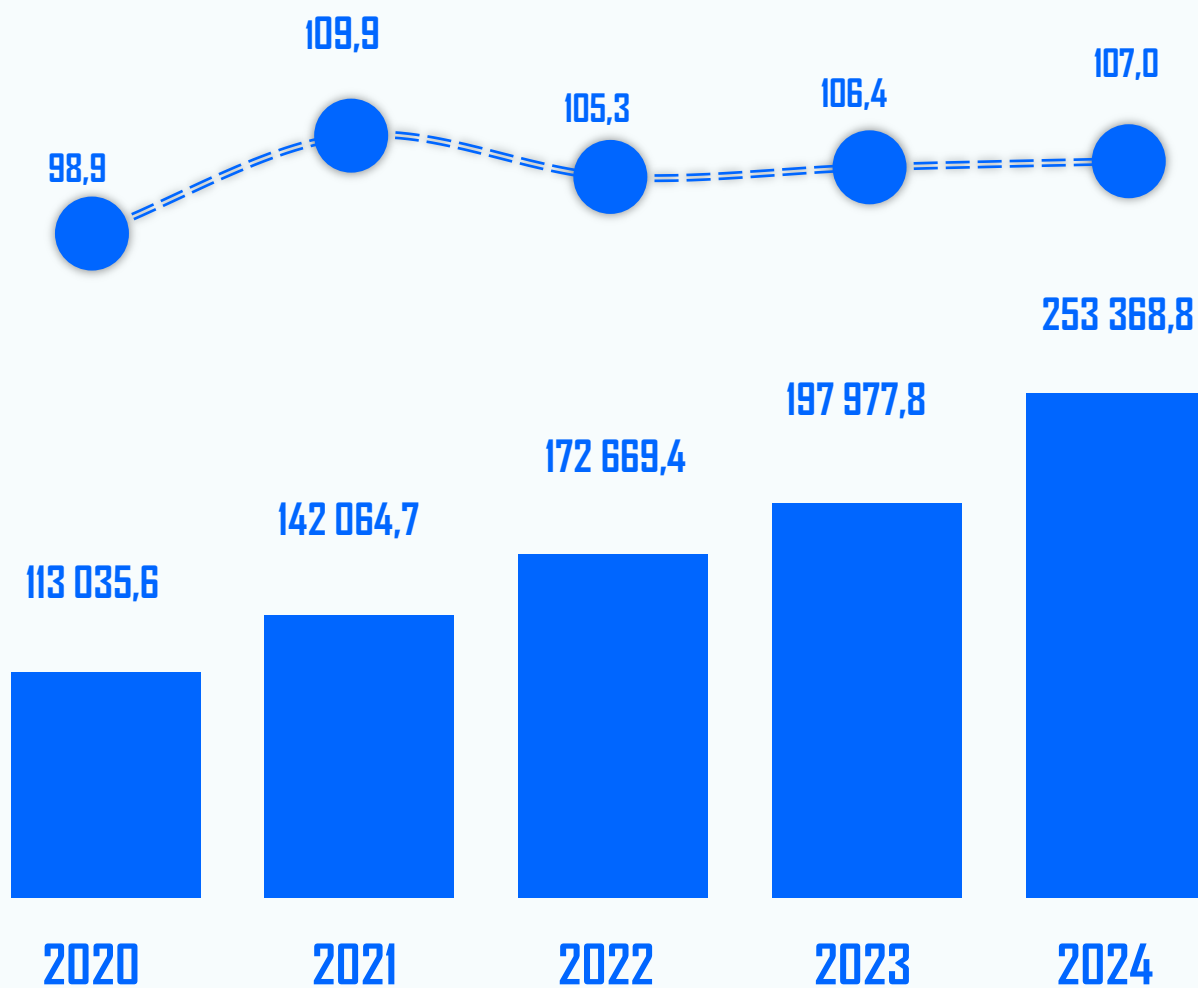

According to the results of January-September 2024 **agriculture, forestry and fisheries** demonstrated positive growth rates of **3.1 %** (in January-September 2023 - **4.0 %**, January-September 2022 - **3.6 %**, January-September 2021 - **4.0 %**, January-September 2020 - **2.6 %**).

✓ **For information:** In January-September 2024, the total volume of products (services) in agriculture, forestry and fisheries amounted to **323 878.0** billion soums. Of their total volume, crop and livestock production, hunting and services provided in these areas account for **97.5 %**, forestry - **1.9 %**, fisheries - **0.6 %**.

According to the results of January-September 2024, the positive growth dynamics in this sector is due to the growth of crop and livestock production, hunting and services provided in these areas by **3.1 %**, forestry by **2.9 %** and fisheries by **1.3 %**.

Gross value added of industry,
January-September

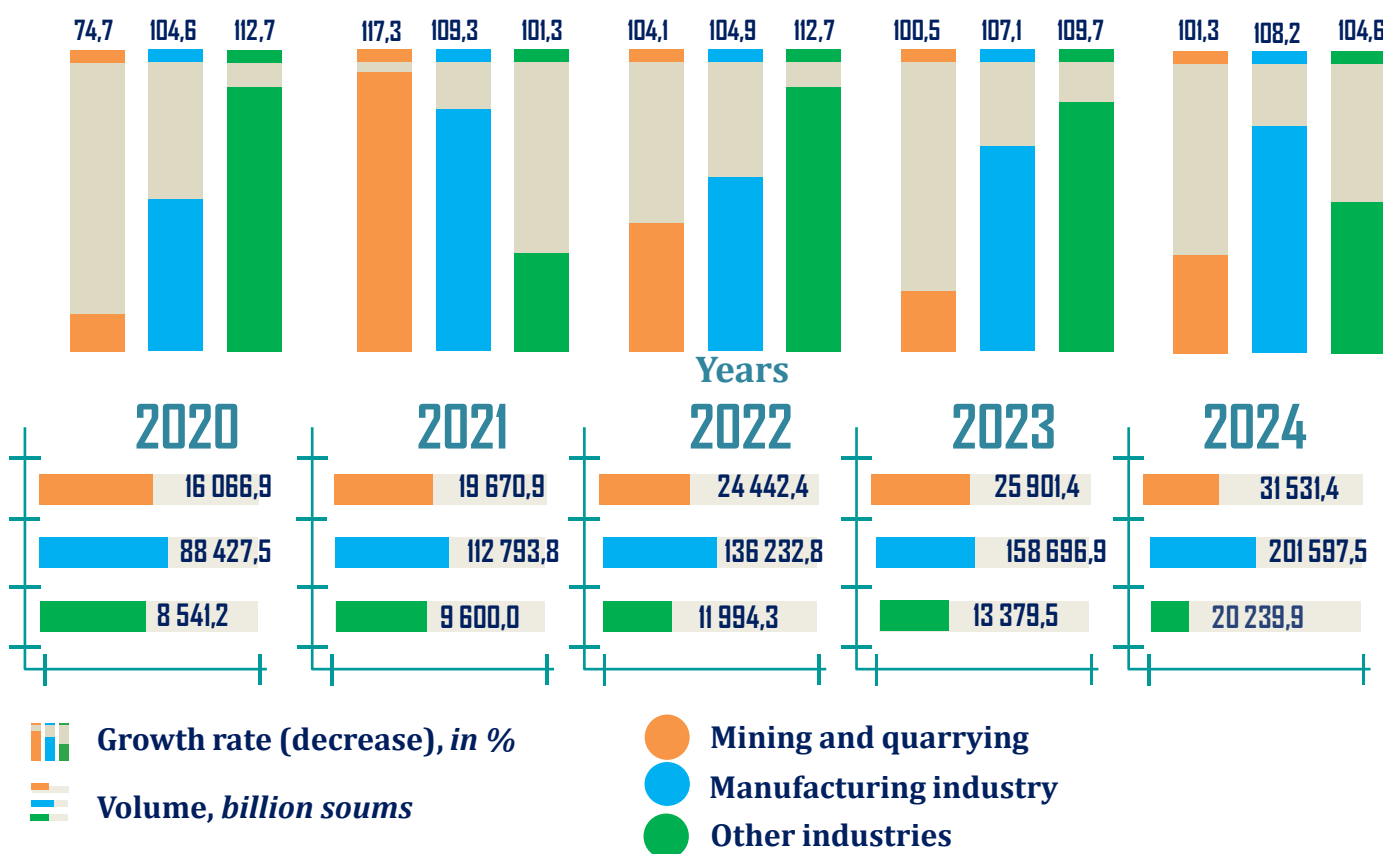

■ Volume, *billion soums* —●— Growth rate (decrease), in % to the corresponding period of the previous year

According to the results of January-September 2024, **the industrial sector** saw an increase in added value by **7.0 %**.

The positive dynamics in this sector are mainly due to the growth of added value in the mining and quarrying industry by **1.3 %**, manufacturing by **8.2 %**, electricity, gas, steam and air conditioning by **4.5 %** and water supply, sewerage, waste collection and disposal by **5.9 %**.

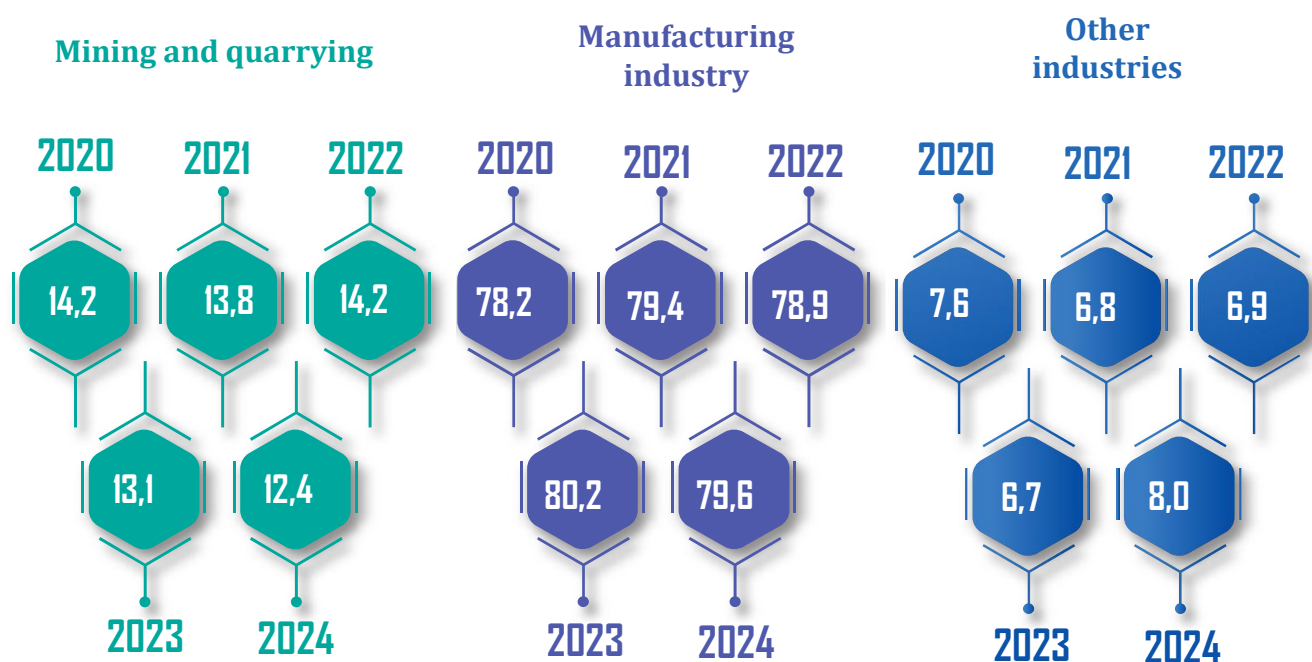

Gross value added of industry,

January-September

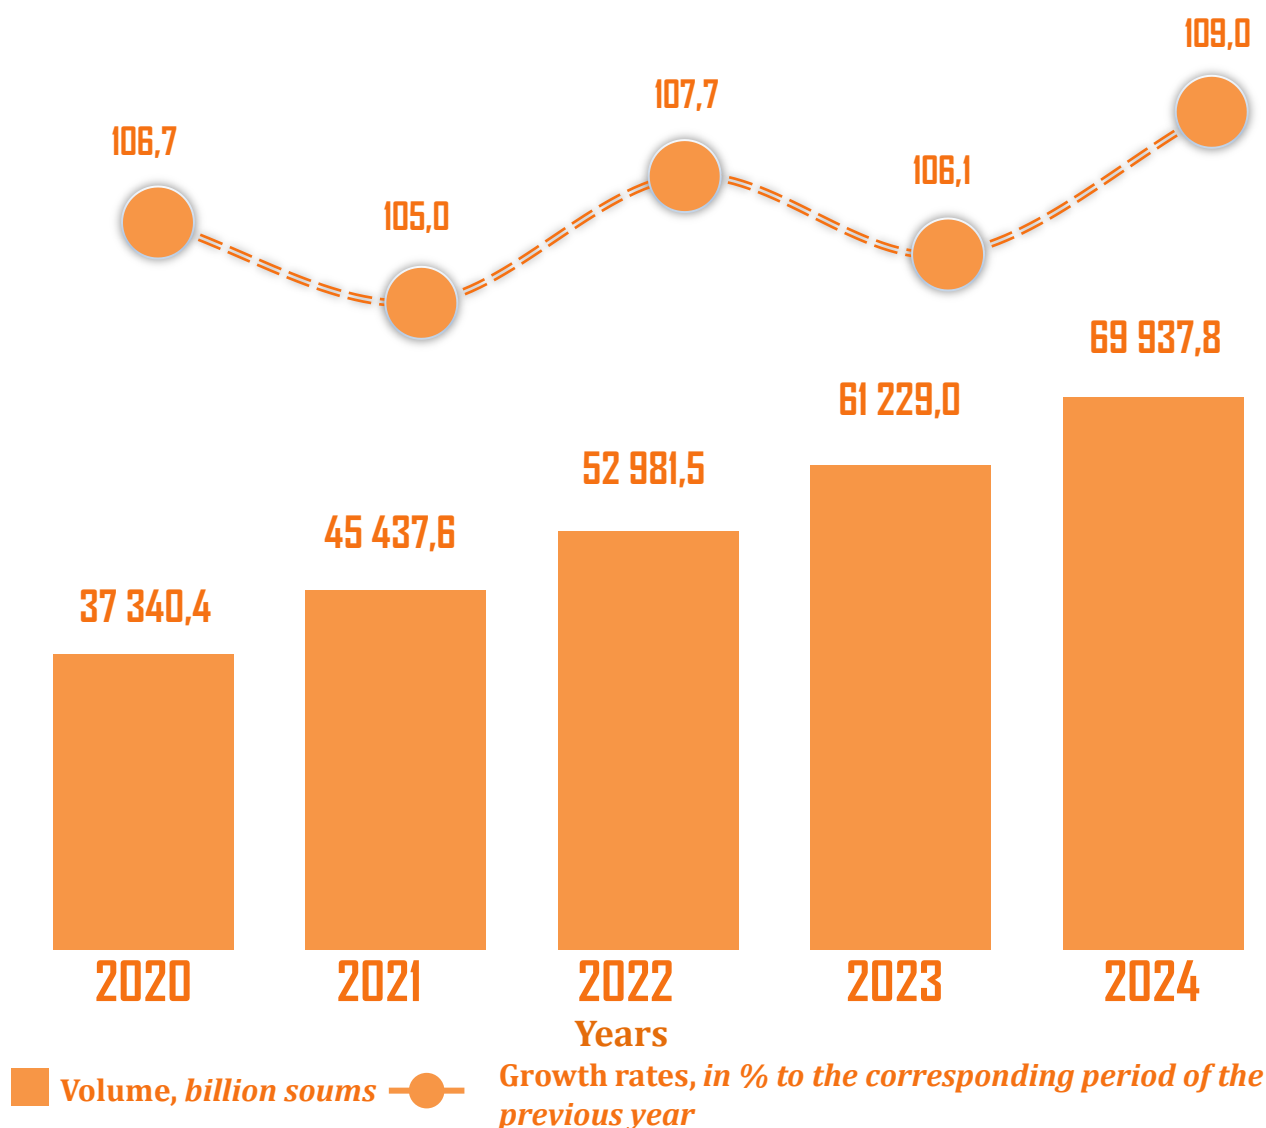

Structure of gross added value of industry,

January-September, in % of total

Gross value added of construction, January-September

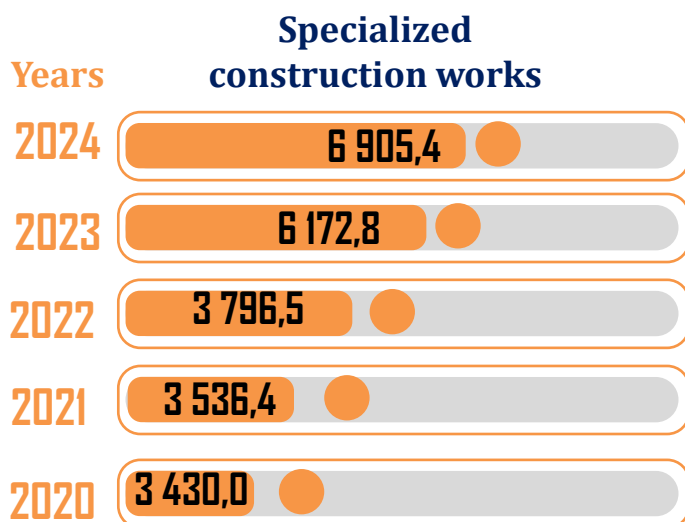

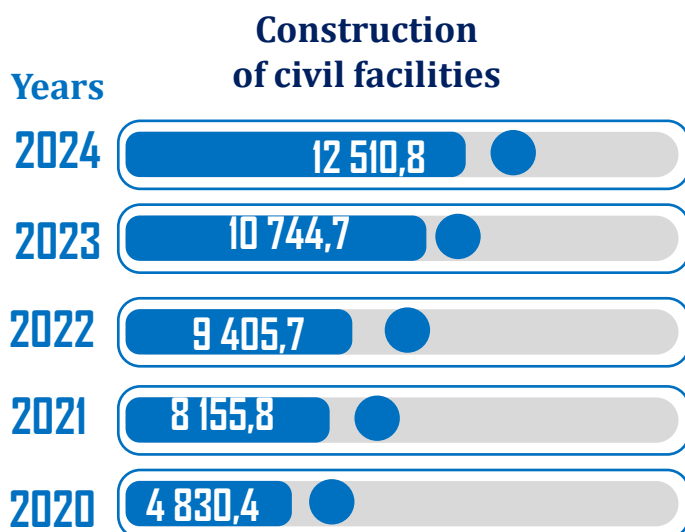

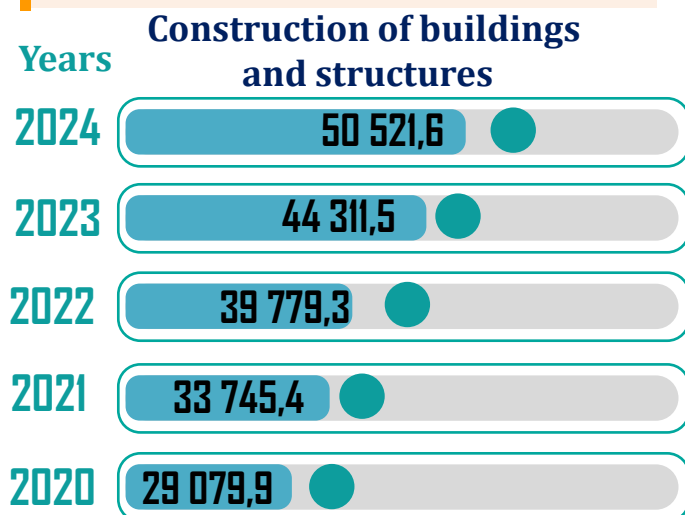

Compared with January-September 2023, **construction work** in January-September 2024 increased by **9.0 %**.

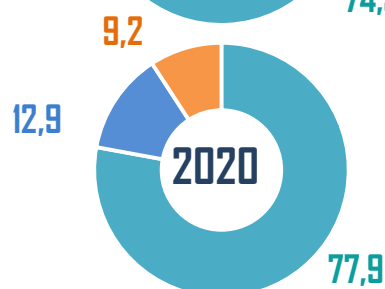

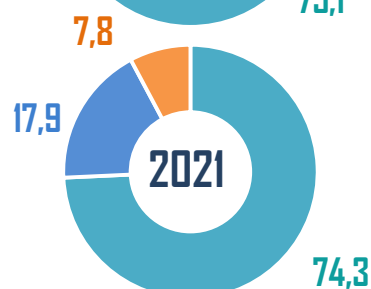

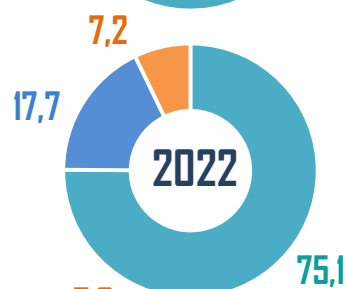

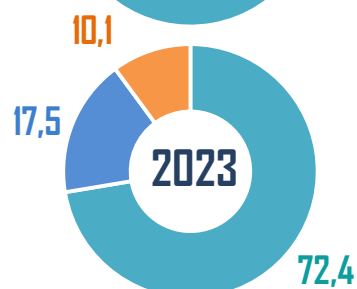

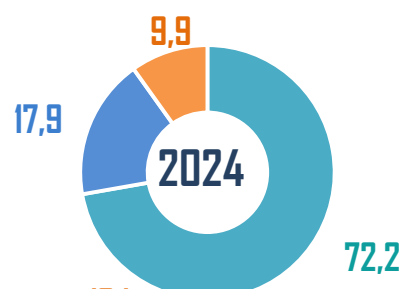

At the same time, the growth rate of construction of buildings and structures amounted to **108.6 %**, civil facilities – **112.5 %**, and specialized construction work – **106.4 %**.

✓ **For information:** In January-September 2024, the volume of construction works amounted to **167 101.2** billion soums. Of the total volume, large organizations accounted for **24.4 %**, small enterprises and microfirms - **48.1 %**, and individuals - **27.5 %**.

Volume of gross value added in construction,
January-September, billion soums

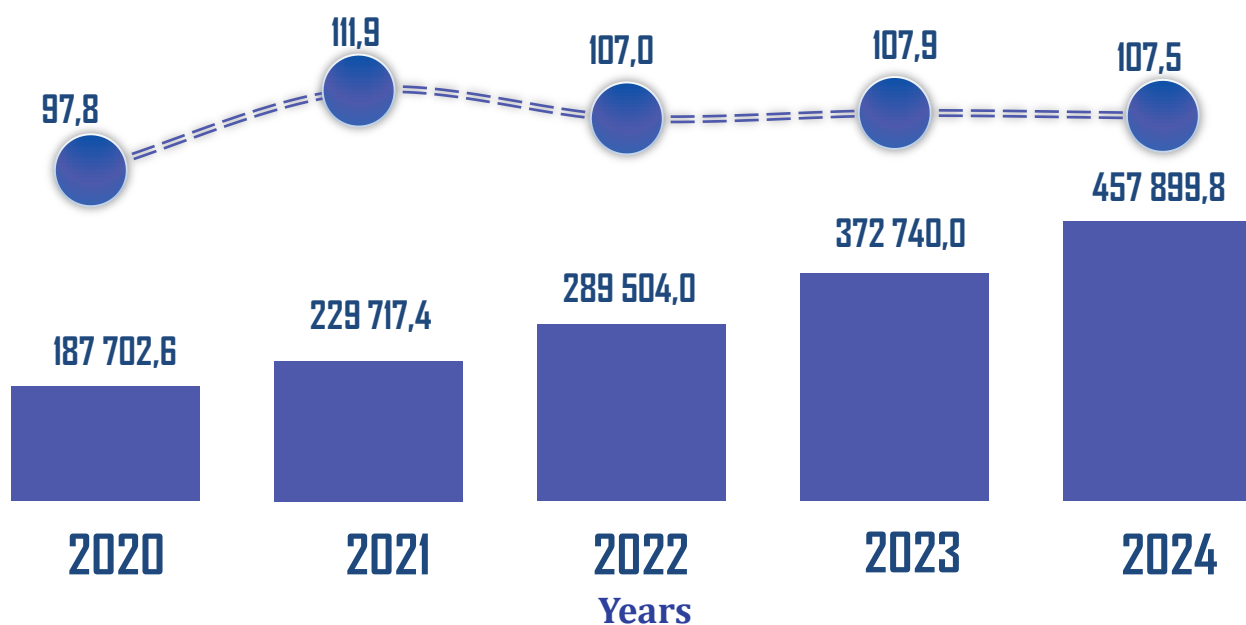

Structure of gross added value of construction,
January-September, in % of total

- Construction of buildings and structures
- Construction of civil facilities
- Specialized construction works

Gross value added of services,

January-September

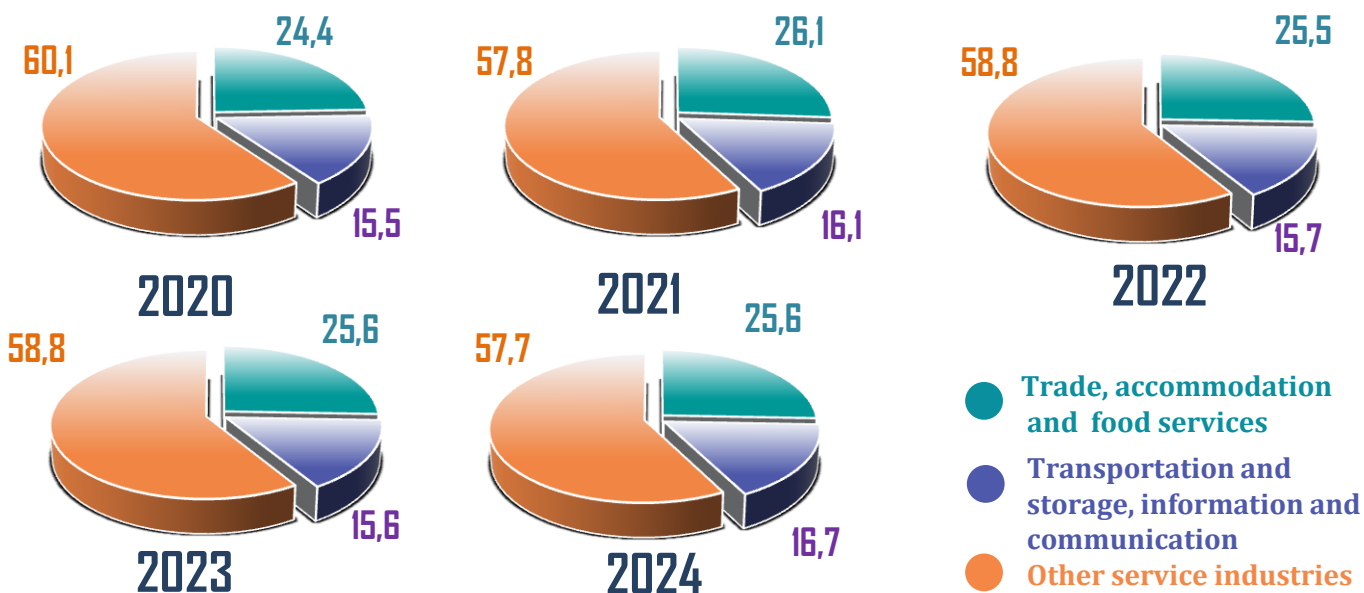

■ Volume, billion soums —●— Growth rate (decrease), in % to the corresponding period of the previous year

According to the results of January-September 2024, the gross added value of the **services sector** amounted to **457 899.8** billion soums and, compared to January-September 2023, increased by **7.5 %**. Including trade services increased by **11.1 %**, accommodation and food - by **10.6 %**, transportation and storage - by **8.7 %**, information and communication - by **22.3 %**, other services - by **4.5 %**.

Structure of gross value added in the service sector,

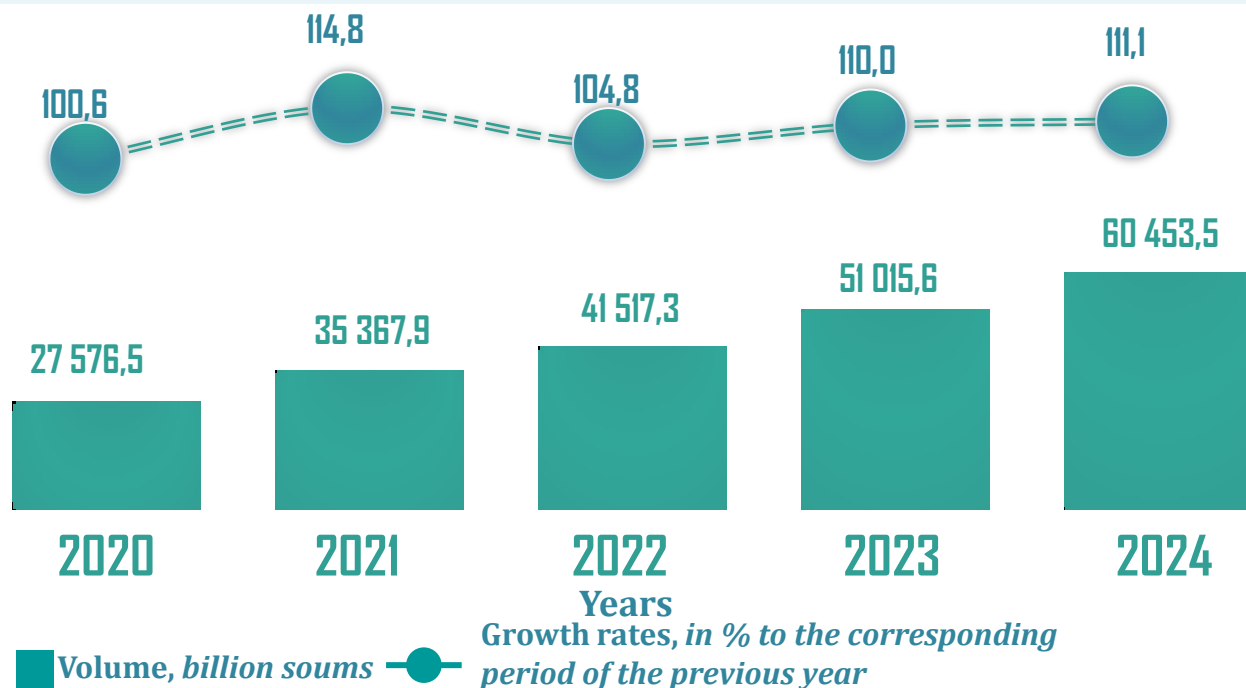

January-September, in % of total

● Trade, accommodation and food services
 ● Transportation and storage, information and communication
 ● Other service industries

Gross value added of trade,

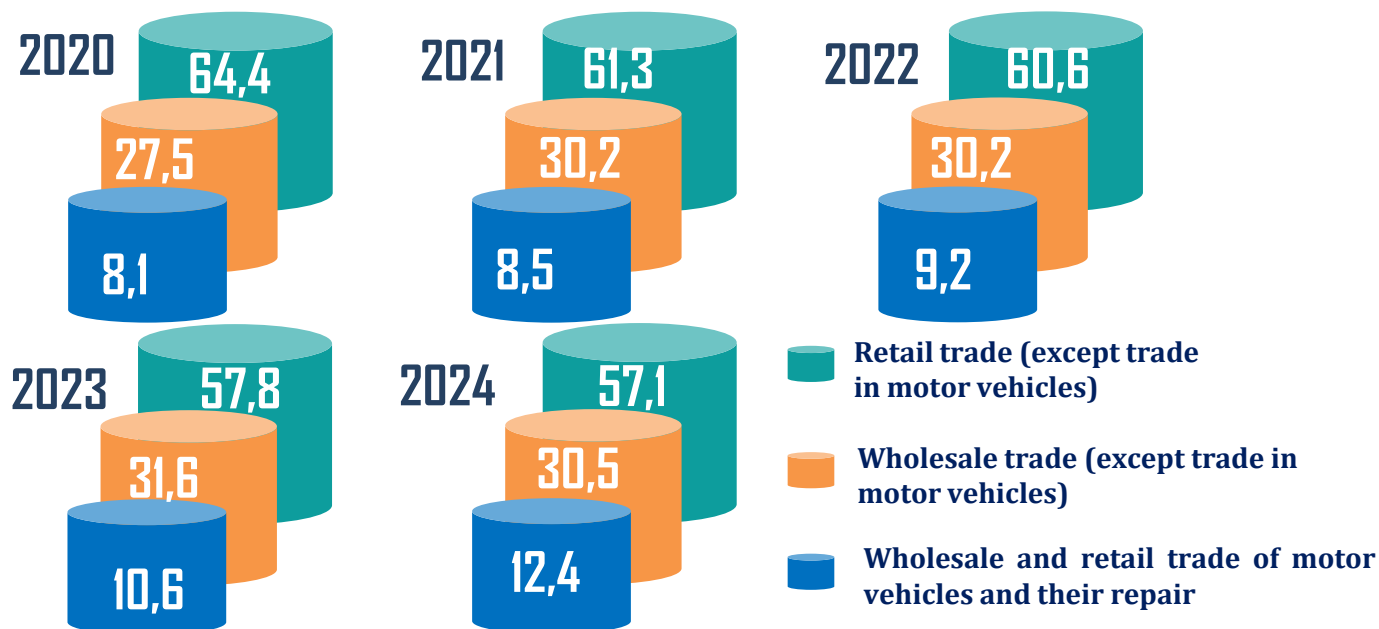

January-September

In January-September 2024, the largest share in the structure of gross added value of **trade** was accounted for by retail trade (except for trade in motor vehicles) and reached **57.1 %**. The share of wholesale trade (except for trade in motor vehicles) was **30.5 %**, wholesale and retail trade in motor vehicles and their repair - **12.4 %**.

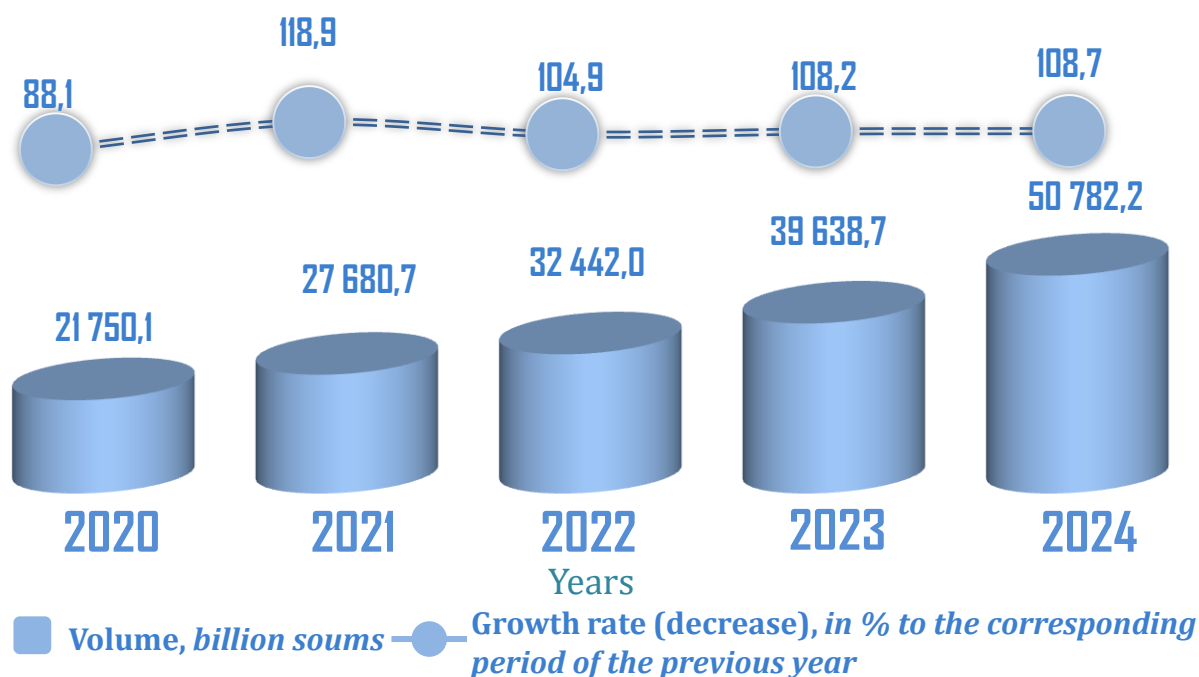

Structure of gross value added of trade,

January-September, in % of total

Gross value added of transportation and storage,

January-September

According to the results of January-September 2024, the share of **transportation and storage** in the GDP of the Republic of Uzbekistan amounted to **5.3 %**.

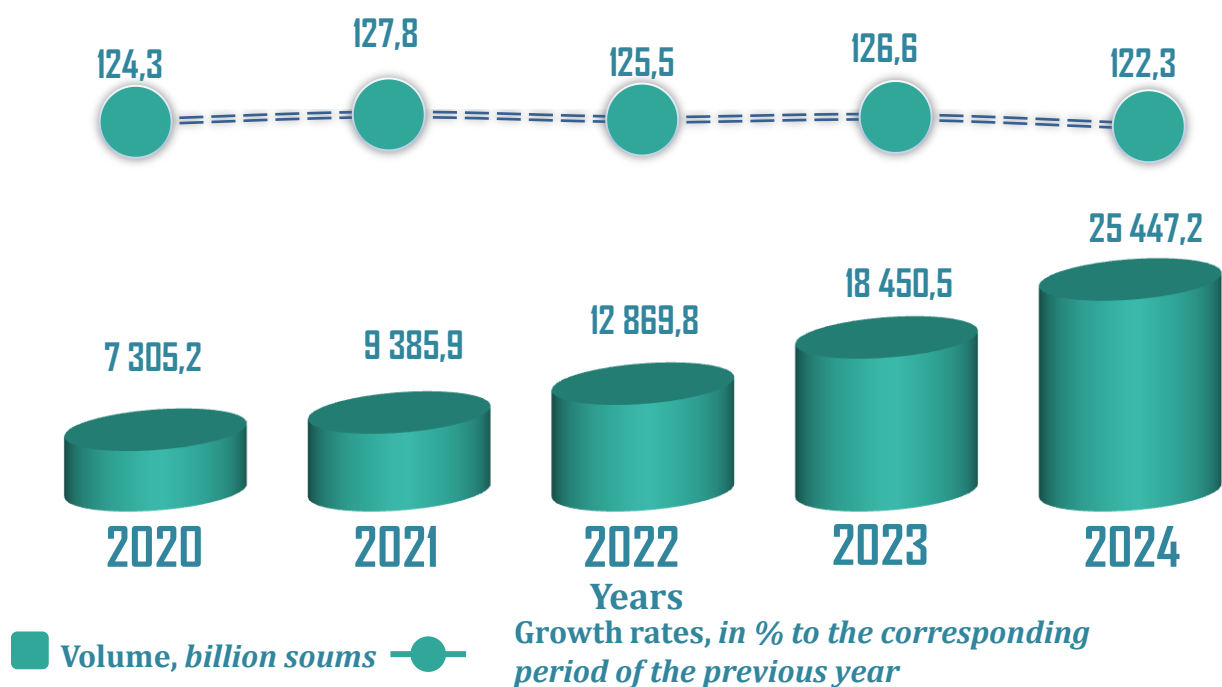

In the structure of gross added value of the transportation and storage industry, the largest share was accounted for by road transport – **53.0 %**. Pipeline transport accounted for **14.7 %**, rail transport – **9.1 %**, auxiliary transport activities – **15.0 %**, air transport – **8.2 %** of the total added value of this industry.

Structure of gross added value of transportation and storage,

January-September, in % of total

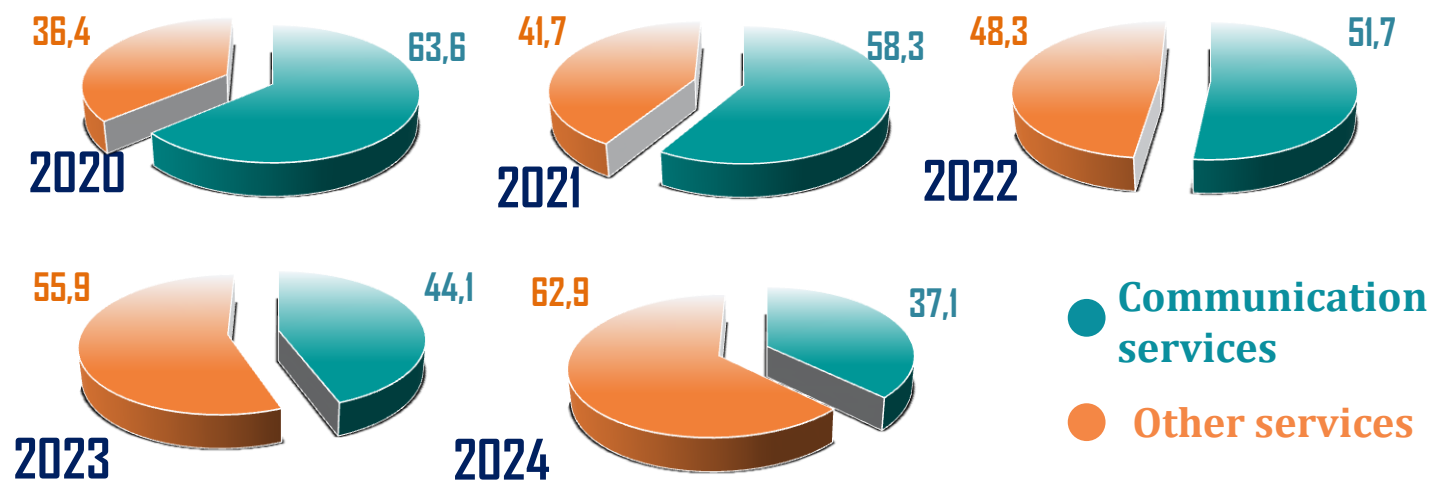

Gross value added of information and communication, January-September

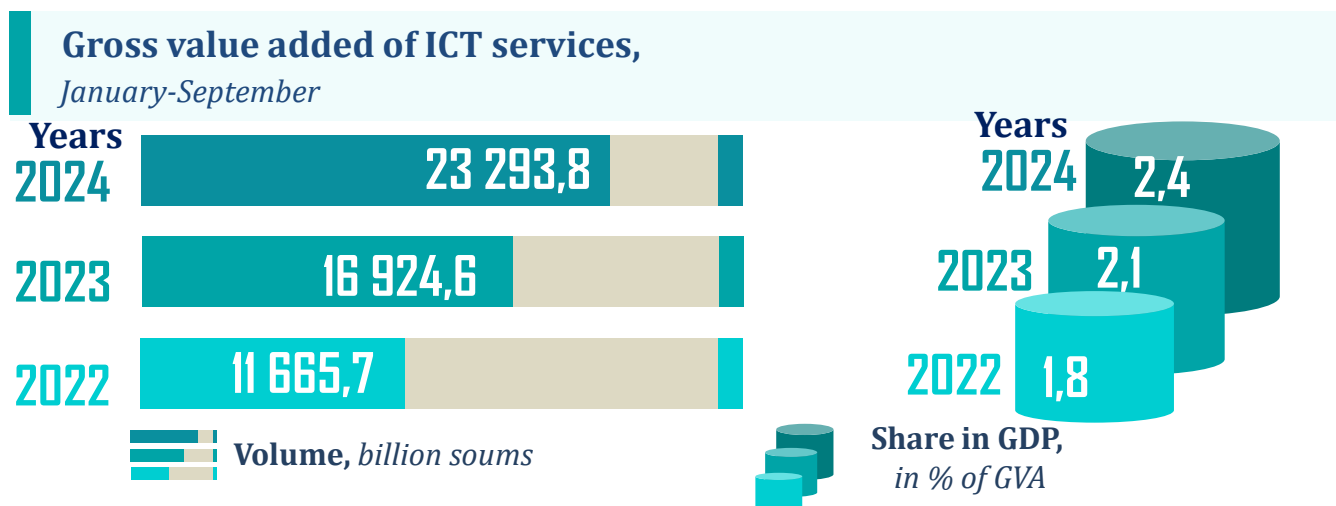

In January-September 2024, the share of **information and communication** in the country's economy was **2.6 %**. In the structure of the added value of this industry, the main share was accounted for by communication services (wired and mobile communication services, the Internet, etc.) and amounted to **37.1 %**. The remaining **62.9 %** of the added value created in this industry comes from other areas (publishing, computer programming, software development and broadcasting, etc.).

Structure of gross value added of information and communication, January-September, in % of total

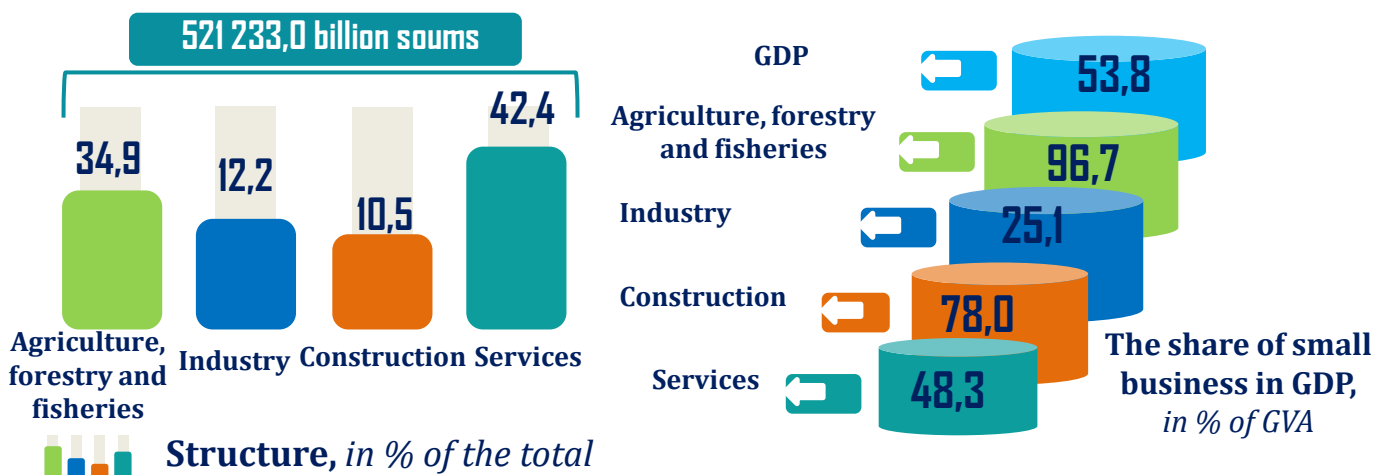

In January-September 2024, the share **of information and communication technology (ICT) services** in the country's economy amounted to 2.4%.

The added value of ICT services consists of communication services – **40.5 %**, computer programming, consulting and other related services – **40.9 %**, data hosting and processing services, Web portals – **9.6 %**, software release – **5.5 %**, repair of computers and communication equipment – **3.5 %**.

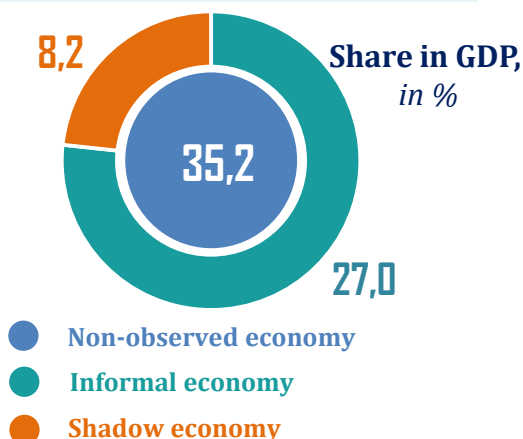

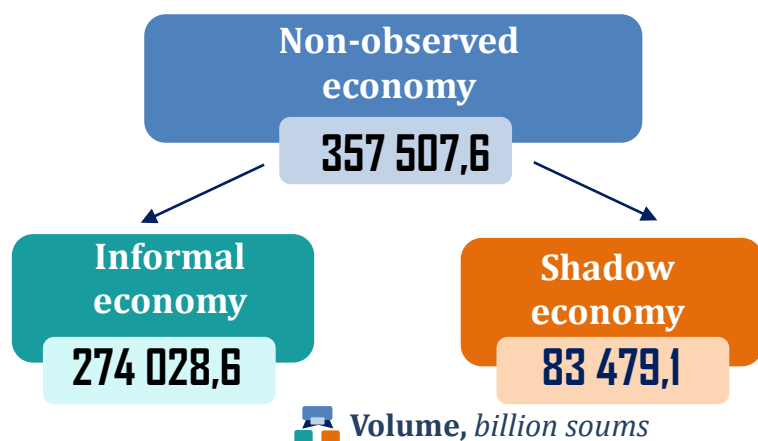

Gross added value created in small entrepreneurship (business) by economic sector for January-September 2024

According to the results of January-September 2024, **small business entities** created added value in the amount of **521 233.0** billion soums, or **53.8 %** of the total added value in the economy. At the same time, the share of agriculture, forestry and fisheries in the total volume of GVA of small business was **34.9 %**, industry - **12.2 %**, construction - **10.5 %** and the service sector - **42.4 %**.

The share of small entrepreneurship (business) in the main sectors of the economy was: in agriculture, forestry and fisheries - **96.7 %**, construction - **78.0 %**, services - **48.3 %** and industry - **25.1 %**.

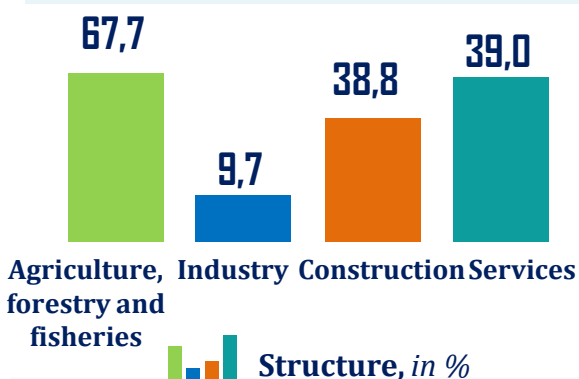

Non-observed economy of the Republic of Uzbekistan for January-September 2024

According to the results of January-September 2024, the gross added value of the informal and shadow economy in the Republic of Uzbekistan amounted to **357 507.6** billion soums, and its share in the gross domestic product was **35.2 %**.

Of these, the gross added value of the informal economy in the Republic of Uzbekistan amounted to **274 028.6** billion soums, and its share in the gross domestic product was **27.0 %**. The gross added value of the shadow economy amounted to **83 479.1** billion soums, and its share in the gross domestic product was **8.2 %**.

Non-observed economy by industry for January-September 2024, in % of the total

In January-September 2024, the structure of the informal and shadow economy in the agriculture, forestry and fisheries sectors amounted to **67.7 %**, in the service sector - **39.0 %**, in construction - **38.8 %**, in industry - **9.7 %**.

- ✓ **Non-observed economy** – types of economic activity that are not fully or partially covered by regular statistical observations and are also estimated using indirect methods when reflected in statistical indicators.
- ✓ **The informal economy** is an economic activity related to the production of goods (provision of services) carried out by households or individuals without registration in the established manner.
- ✓ **The shadow economy** is an economic activity that is not prohibited by law, but is intentionally hidden from government authorities for the purpose of tax evasion and non-compliance with legal requirements.
