

GROSS DOMESTIC PRODUCT

According to preliminary estimates, the GDP of the Republic of Uzbekistan for 2018 in current prices amounted to 407,514.5 billion soums and increased in real terms by 5.1%, compared with 2017. GDP deflator in relation to prices in 2017 amounted to 128.1%.

GDP per capita reached 12 365.6 thousand soums, which is 3.3% greater than in the corresponding period of the last year.

The GDP by type of economic activity is characterized by the following data:

	in billion soums		Volume index	Impact on GDP growth, %
	2017	2018		
GDP – total	302 536,8	407 514,5	105,1	5,1
<i>including:</i>				
Gross value added	267 744,8	361 951,1	105,1	4,5
agriculture, forestry and fisheries	90 983,9	117 315,8	100,3	0,1
industry	59 570,4	95 083,9	110,6	2,1
construction	15 228,6	20 734,4	109,9	0,5
trade, accommodation and food services	21 540,6	26 493,0	104,4	0,3
transportation and storage, information and communication	25 305,5	29 868,3	106,3	0,5
other sectors of services	55 115,8	72 455,7	105,4	1,0
Net taxes on products	34 792,0	45 563,4	105,5	0,6

The economic growth rate is due to the positive dynamics in the main sectors of the economy. Gross value added created by all sectors of the economy amounted to 88.8% of total GDP and increased by 5.1% (contribution to GDP growth - 4.5 percentage points). Net taxes on products amounted to 11.2% in the structure of GDP and showed an increase of 5.5% (the contribution in GDP growth - 0.6 percentage points).

GDP growth by type of economic activity in 2018

The largest contribution to GDP growth was made by industry (2.1 pp), which increased by 10.6% compared to the previous year. The positive dynamics in this industry was achieved due to the growth of the value added of the mining industry and quarrying - by 28.2%, the manufacturing industry - by 6.4%, and other industries - by 4.7%.

The structure of gross value added in industry

	<i>in billion soums</i>		<i>Volume index, %</i>
	<i>2017</i>	<i>2018</i>	
Industry	59 570,4	95 083,9	110,6
<i>including:</i>			
mining and quarrying	12 052,0	24 634,0	128,2
manufacturing industry	42 243,5	63 532,8	106,4
other sectors of industry	5274,9	6 917,1	104,7

The structure of gross value added in industry

(% as of total)

At the end of 2018, in gross value added structure of the manufacturing industry, the highest percentage refers to metallurgical and metal-processing industry (except machinery and equipment) - 24.5%. The share of food, beverages and tobacco production was 17.0%, textiles, clothing, leather goods and related products - 16.1%, rubber, plastic products and other non-metallic mineral products - 11.3%, chemical products - 9.2%, motor vehicles, trailers, semi-trailers and other transport equipment - 7.4%, electrical equipment - 3.5% and other products of the manufacturing industry - 11.0%.

The structure of the gross value added in manufacturing industry
(% as of total)

	<i>2017</i>	<i>2018</i>
Manufacturing industry - total	100,0	100,0
Food, beverage and tobacco manufacturing	22,8	17,0
Production of textiles, clothing, leather goods and related products	18,4	16,1
Manufacture of wood and paper products; printing and reproduction of recorded media	2,8	2,3
Manufacture of coke and refined petroleum products	2,0	2,1
Chemical production	8,8	9,2
Manufacture of basic pharmaceutical products and preparations	1,6	1,3
Manufacture of rubber, plastic products and other non-metallic mineral products	12,1	11,3
Metallurgical and metal-processing industry (excluding machinery and equipment)	18,8	24,5
Manufacture of computers, electronic and optical products	0,6	0,6
Manufacture of electrical equipment	2,5	3,5
Manufacture of machinery and equipment not included in other categories	1,2	1,8
Manufacture of motor vehicles, trailers, semi-trailers and other transport equipment	4,3	7,4

	2017	2018
Manufacture of other finished products; repair and installation of machinery and equipment	4,1	2,9

A positive contribution to GDP growth from the service sector amounted to 1.8 percentage points. In this sphere, there is an increase by 5.4% in value added. Out of it, trade services (including repair of motor vehicles) grew by 4.4%, accommodation and food services - by 4.5%, transportation and storage - by 3.7%, information and communication - by 15.3%, other sectors of services - by 5.4%.

Construction volume increased by 9.9%, compared to the corresponding period of the last year. A positive contribution to GDP growth from the construction is estimated at 0.5 percentage points.

As of 2018, in agriculture, forestry and fisheries, positive growth rates are observed at the level of 0.3%. The contribution of this industry to GDP growth was 0.1 percentage points.

Contribution of sectors to GDP growth in 2018

In 2018, the GDP deflator reached 128.1% relative to 2017 prices. The highest values of deflator in the structure of GDP were recorded in industry - 144.3%, agriculture, forestry and fisheries - 128.6%.

Deflator below the national average were recorded in construction - 123.9%, trade, accommodation and food services - 117.8%, transportation and

storage, information and communication - 111.0%, other services industries - 124.8%, and in net taxes on products - 124.1%.

GDP deflator by types of economic activity in 2018

Compared to the corresponding period of the last year, a share of agriculture, forestry and fisheries in sectoral composition of GDP decreased by 1.6 percentage points and amounted 32.4%.

A share of industry increased from 22.2% to 26.3%, while a share of construction remained at the level of 2017 and amounted to 5.7%.

A share of services sphere in sectoral composition of GDP was 35.6% and decreased by 2.5 percentage points, compared with 2017.
