

PRODUCTION OF GROSS DOMESTIC PRODUCT OF THE REPUBLIC OF UZBEKISTAN

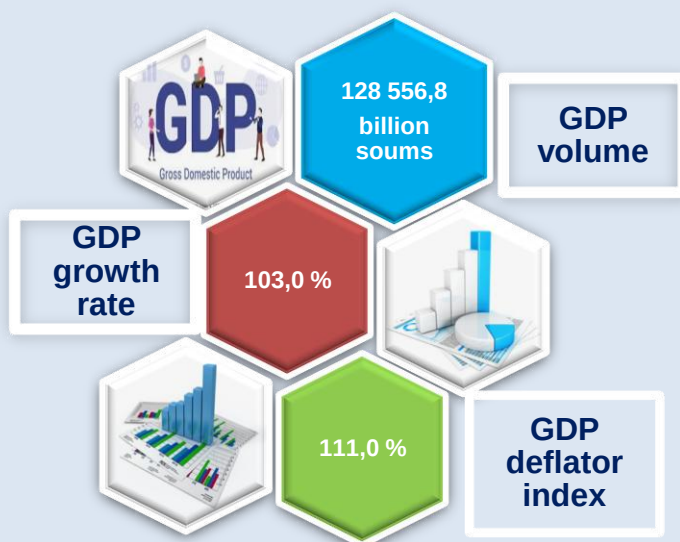

**for January-March
2021**

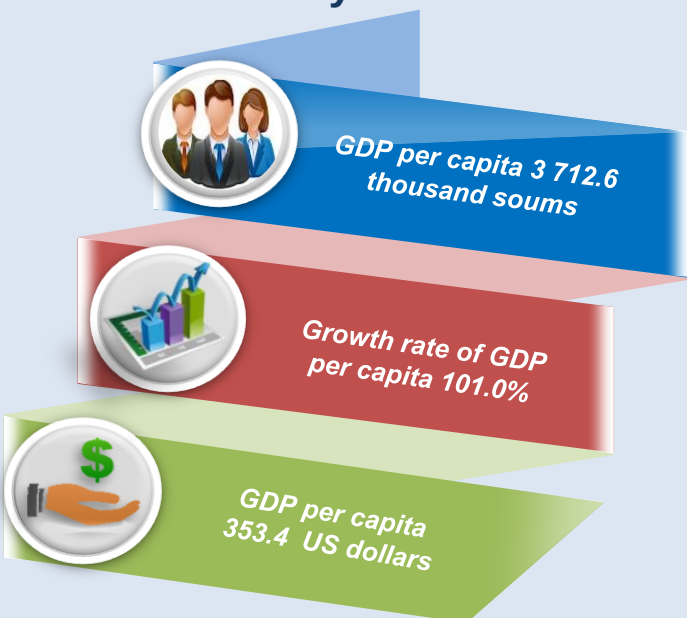

PRODUCTION OF GROSS DOMESTIC PRODUCT

According to a preliminary estimate, in January-March 2021, the gross domestic product (hereinafter - GDP) of the Republic of Uzbekistan in current prices amounted to 128 556.8 billion soums and, compared to January-March 2020, increased in real terms by 3.0%. The GDP deflator index, in relation to the prices of January-March 2020, amounted to 111.0%.

GDP of the Republic of Uzbekistan for January-March 2021

GDP per capita for January-March 2021

In January-March 2021, GDP per capita in current prices amounted to 3 712.6 thousand soums (or, in the equivalent - 353.4 US dollars) and, compared to January-March 2020, increased by 1.0 %.

PRODUCTION OF GROSS DOMESTIC PRODUCT

According to the results of January-March 2021, in the structure of the GDP produced, the gross added value of the production of goods amounted to 64 763.1 billion soums, the services sector – 52 002.1 billion soums, and net taxes on products – 11 791.6 billion soums.

Calculated in US dollars at the average exchange rate for the reporting period, nominal GDP was formed in the amount of 12 236.4 million US dollars (for January-March 2020 – 11 805.7 million US dollars).

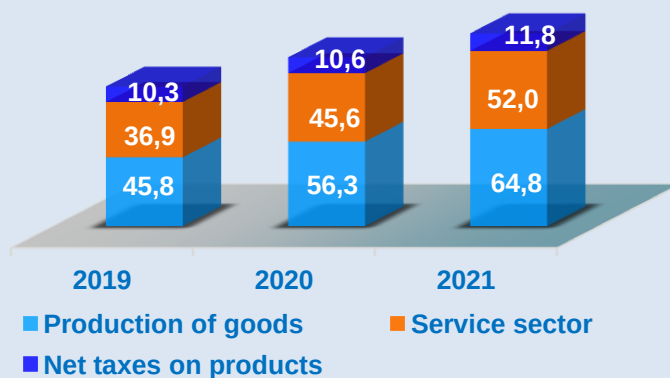

In January-March 2021, GDP growth slowed down to 3.0% against 4.6% in January-March 2020 and 6.0% in January-March 2019. At the same time, the GDP deflator index slowed down to 111.0% after 115.6% in January-March 2020 and 120.9% in the corresponding period of 2019.

For reference: in January-March 2021, the official exchange rate of the US dollar in relation to the soums averaged 10 506.1 soums, in the same period of 2020 – 9 529.6 soums.

* Hereinafter, the data for January-March 2019 are given with clarifications..

(in% to the corresponding period of the last year)

PRODUCTION OF GROSS DOMESTIC PRODUCT

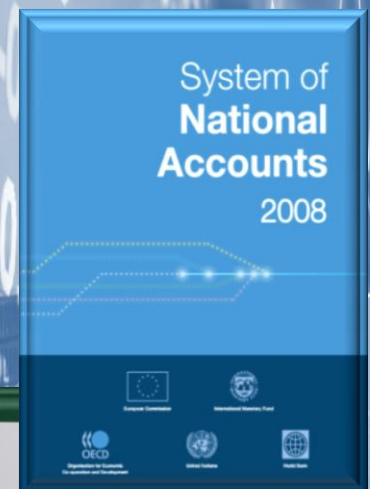

GDP is one of the most important indicators of the System of National Accounts, which characterizes the final result of the production activity of resident economic units, which is measured by the value of goods and services produced by these units for final use.

The volume index (real growth rates) of GDP is calculated as the ratio of the GDP of the reporting period, calculated in constant prices, i.e. in prices of the corresponding period of the last year (real GDP) to GDP in current prices of the corresponding period of the last year.

The GDP deflator index characterizes the average price change in the economy and is calculated as the ratio of nominal GDP (GDP of the reporting period in current prices) to real GDP.

PRODUCTION OF GROSS DOMESTIC PRODUCT

For reference: GDP per capita is determined by dividing its total volume in current prices by the average population of the country for a certain period of time. The average resident population of the Republic of Uzbekistan was: in January-March 2019 - 33 316 thousand people, in January-March 2020 - 33 971 thousand people, in January-March 2021 - 34 627 thousand people.

Real growth rates of GDP per capita for January-March 2019-2021 (in % to the previous period last year)

GDP per capita for January-March 2019-2021 (in current prices, thousand soums)

As it is clear from the presented diagram, in January-March 2021, GDP per capita growth in real terms slowed down to 1.0% against growth by 2.6% in January-March 2020 and by 4.0% in January-March 2019.

PRODUCTION OF GROSS DOMESTIC PRODUCT

GDP growth rates by type of economic activity for January-March 2021
(in% to the corresponding period of the last year)

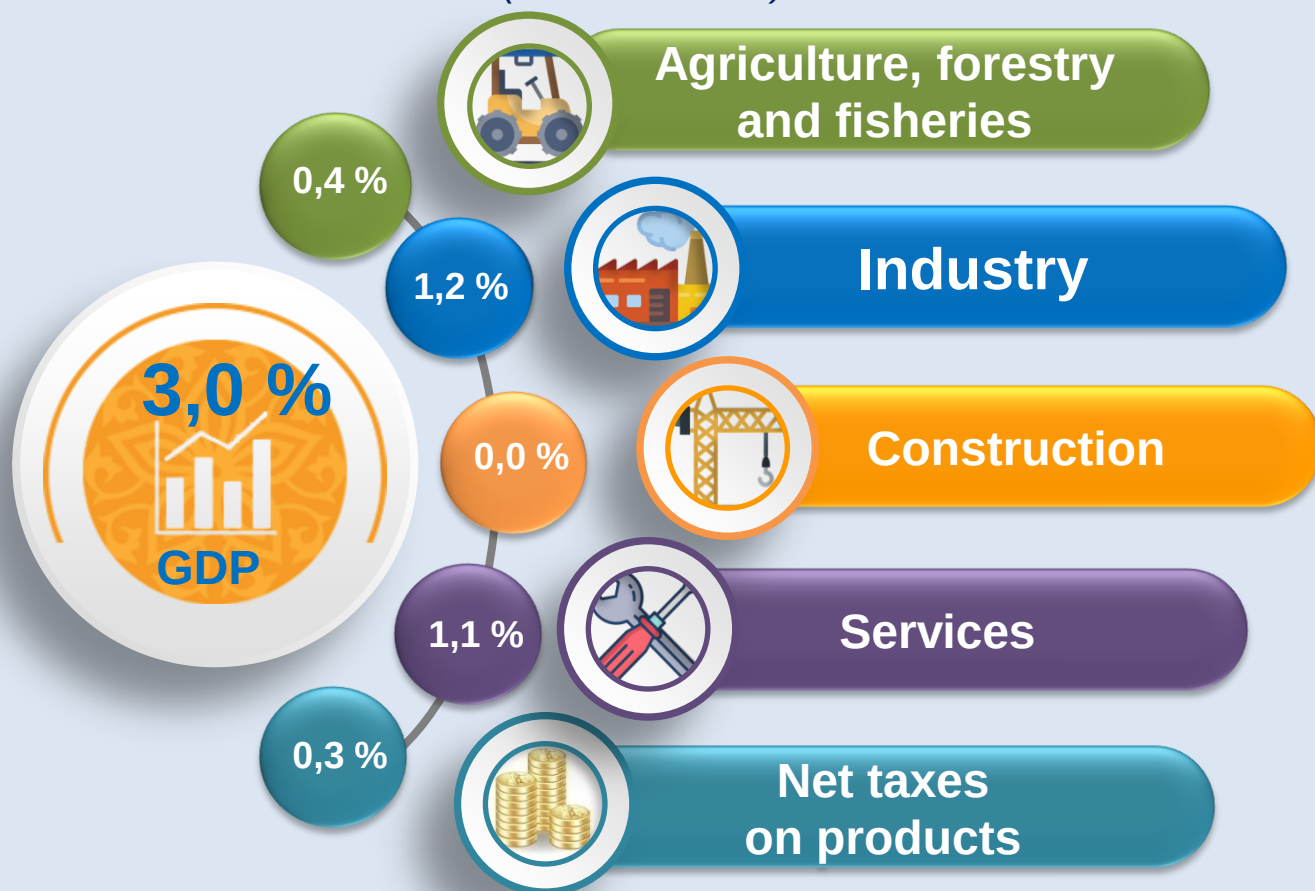

The gross value added created by all sectors of the economy amounted to 90.8% of the total GDP and increased by 3.0% (contribution to GDP growth - 2.7 percentage points). Net taxes on products in the structure of GDP amounted to 9.2% and increased by 2.8% (contribution to GDP growth - 0.3 percentage points).

PRODUCTION OF GROSS DOMESTIC PRODUCT

A positive contribution to GDP growth was made by the sectors of agriculture, forestry and fisheries - 0.4 percentage points. (in January-March 2020 – 0.5 percentage points), industry - 1.2 percentage points (in January-March 2020 - 0.6 percentage points) and the service sector - 1.1 percentage points (in January-March 2020 - 2.5 percentage points). The construction industry had almost no impact on GDP growth (in January-March 2020 - 0.5 percentage points), added value, compared to January-March 2020, increased by 0.5%. Due to the growth of net taxes on products, GDP increased by 0.3 percentage points. (in January-March 2020 - 0.5 percentage points).

Contribution of industries to GDP growth in January-March 2021 (in % to the total)

9

PRODUCTION OF GROSS DOMESTIC PRODUCT

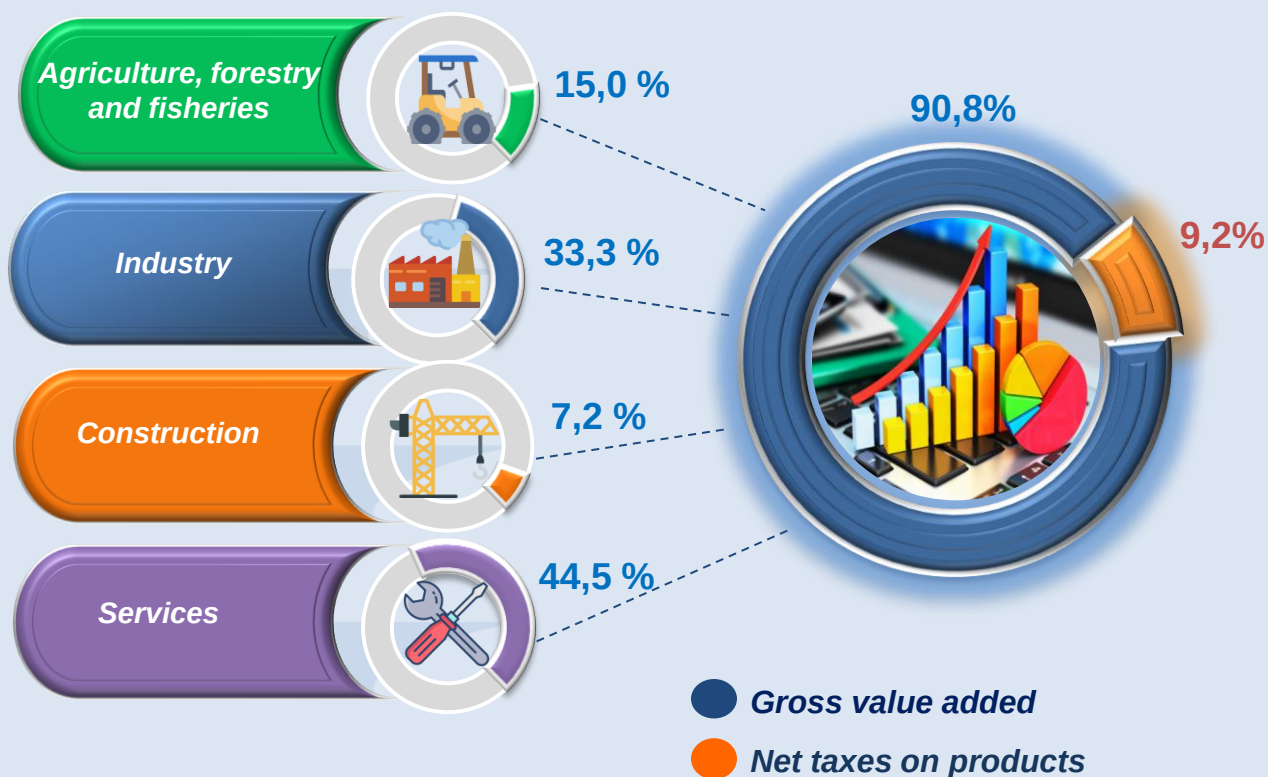

Structure of GDP by type of economic activity for January-March 2019-2021 (in% to the total)

	2019	2020	2021
I. GDP, total	100,0	100,0	100,0
<i>including:</i>			
gross value added by industries	88,9	90,6	90,8
net taxes on products	11,1	9,4	9,2
II. Gross value added by industries	100,0	100,0	100,0

other service industries	26,0	27,1	27,0

PRODUCTION OF GROSS DOMESTIC PRODUCT

Sectoral structure of GDP for January-March 2021 (in% to the total)

At the end of January-March 2021, insignificant changes were noted in the sectoral structure of GDP. Thus, the share of agriculture, forestry and fisheries in the sectoral structure of GDP (GVA) increased from 14.4% to 15.0%, while the share of industry decreased from 33.5% to 33.3%, construction - from 7.3% to 7.2% and the service sector - from 44.8% to 44.5%.

GROSS ADDED VALUE OF AGRICULTURE, FORESTRY AND FISHERIES

At the end of January-March 2021, **agriculture, forestry and fisheries** showed a positive growth rate of 3.1%. The positive dynamics in this industry is due to an increase in crop production by 5.0% (in January-March 2020 - an increase of 6.4%, in January-March 2019 - an increase of 0.6%) and livestock - by 3.0% (in January-March 2020 - an increase of 3.6%, in January-March 2019 - an increase of 3.4%).

***For information:** according to preliminary data, in January-March 2021, the volume of production in physical terms was:*

<i>Product name</i>	<i>Production volume</i>	<i>Growth rate, %</i>	
Vegetables	65,7 thousand tons	105,0	
Meat in live weight	493,2 thousand tons	103,5	
Milk	1 823,3 thousand tons	102,6	
Eggs	1 374,4 million pieces	100,2	

GROSS VALUE ADDED OF INDUSTRY

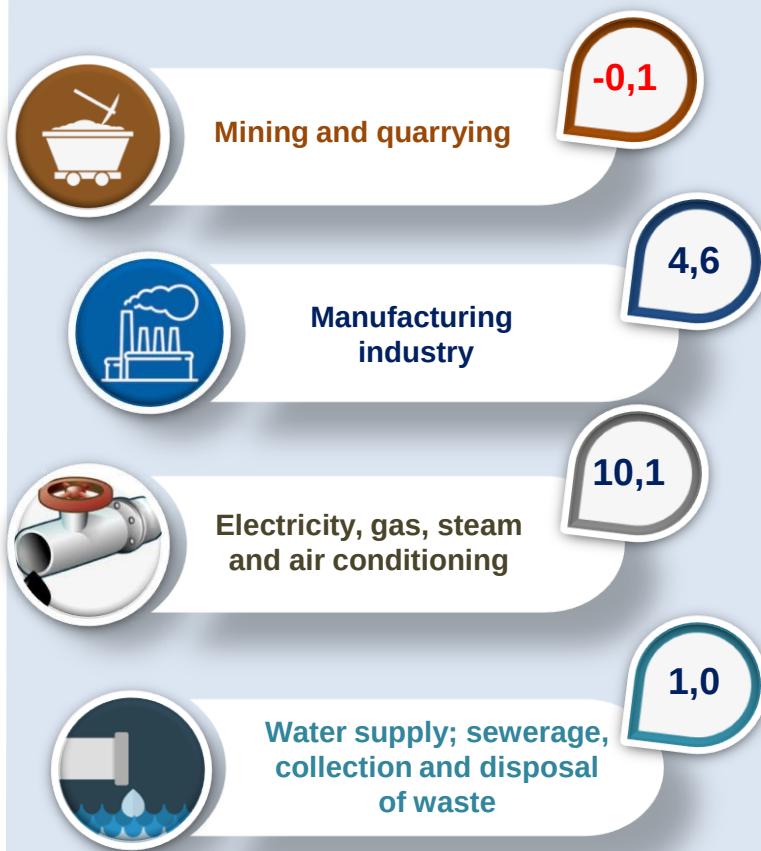

The industry has seen an increase in value added in comparable prices by 3.8%. The positive dynamics in this industry is mainly due to an increase in the added value of the manufacturing industry by 4.6% (in January-March 2020 - by 6.5%, in January-March 2019 - by 5.6%). The electricity, gas, steam and air conditioning industry also showed positive growth of 10.1% against growth of 7.9% in January-March 2020 and 5.1% in January-March 2019.

The added value of water supply, sewerage, waste collection and disposal showed an increase of 1.0% (in January-March 2020 - a decrease by 14.5%, in January-March 2019 - a decrease by 1.8%).

The added value in the mining and quarrying industry decreased by 0.1% (in January-March 2020 - a decrease of 13.3%, in January-March 2019 – an increase of 3.9%). At the same time, the decrease in the added value of this industry was mainly influenced by the decrease in coal production by 6.3% and gas condensate by 0.8%.

Growth rates of gross value added of industry in January-March 2021 (in% to the corresponding period of the last year)

GROSS VALUE ADDED OF INDUSTRY

GROSS VALUE ADDED OF INDUSTRY

Industry gross value added structure for January-March 2019-2021 (in % of total)

Mining and quarrying

Manufacturing industry

Other industries

In the period under review, the share of the manufacturing industry in the structure of value added in the industrial sector increased to 73.8% against 70.2% in January-March 2020. Accordingly, there was a decrease in the share of the mining industry and quarrying to 17.1% (in January-March 2020 - 20.4%).

At the end of January-March 2021, the largest share in the structure of value added in the manufacturing industry fell on the metallurgical and metalworking industry (except for machinery and equipment), which reached 42.7%.

The share of production of textiles, clothing, leather and related products amounted to 14.7%, food, beverages and tobacco products - 13.1%, chemical products - 8.3%, rubber, plastic products and other non-metallic mineral products - 7.1%, vehicles, trailers, semi-trailers and other transport equipment - 3.8%, computers, electronic and optical products - 2.3%, coke and petroleum products - 2.1% and other manufacturing products - 5.9%.

GROSS VALUE ADDED OF INDUSTRY

The structure of the gross value added of the manufacturing industry for January-March 2019-2021 (in % of total)

	2019	2020	2021
Manufacturing industry, total	100,0	100,0	100,0
Food, beverage and tobacco manufacturing	13,8	13,6	13,1
Manufacture of textiles, clothing, leather products and related products	13,5	13,8	14,7
Manufacture of wood and paper products; printing activity and duplication of recording media	1,9	1,6	1,2
Production of coke and refined petroleum products	3,2	3,2	2,1
Chemical production	9,1	8,4	8,3
Manufacturing of basic pharmaceutical products and drugs	0,7	1,0	0,7
Manufacture of rubber, plastic products and other non-metallic mineral products	8,1	7,6	7,1
Metallurgical and metalworking industry (except for machinery and equipment)	36,7	38,3	42,7
Manufacture of computers, electronic and optical products	0,6	1,4	2,3
Manufacture of electrical equipment	1,8	1,7	1,7

2021

For information: in January-March 2021, the volume of construction work amounted to 19 547.4 billion soums. Large organizations account for 20.9% of the total volume of construction work, small enterprises and microfirms - 59.7%, individuals - 19.4%.

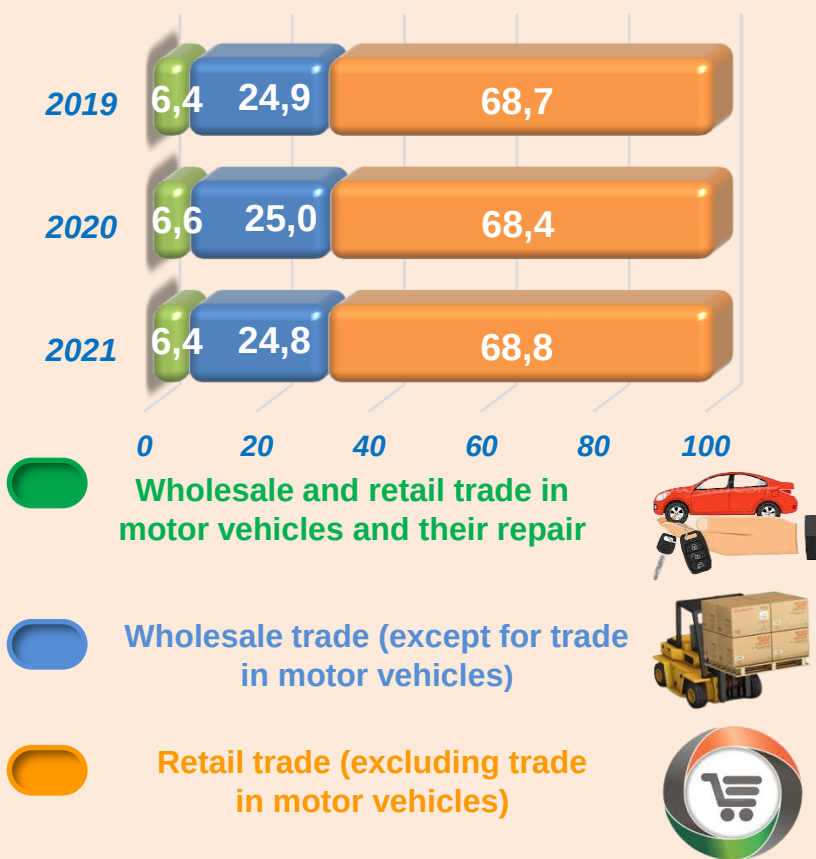

GROSS VALUE ADDED BY TRADE INDUSTRY

At the end of January-March 2021, the gross value added of the service sector amounted to 52 002.1 billion soums and, compared to the corresponding period of 2020, increased by 2.8%. Including trade services increased by 2.8%, accommodation and food - by 4.4%, information and communication - by 16.6%. Along with this, transportation and storage services decreased by 4.1%.

Dynamics of the structure of gross value added of trade (including repair of motor vehicles) in January-March 2019-2021 (in% of the total)

In January-March 2021, in the structure of gross value added of trade, the largest share fell on retail trade (excluding trade in motor vehicles) and reached 68.8% (in January-March 2020 - 68.4%, in January-March 2019 - 68.7%).

The share of wholesale trade (except for trade in motor vehicles) amounted to 24.8% (in January-March 2020 - 25.0%, in January-March 2019 - 24.9%), wholesale and retail trade in motor vehicles and their repairs - 6.4% (in January-March 2020 - 6.6%, in January-March 2019 - 6.4%).

GROSS VALUE ADDED BY TRANSPORTATION AND STORAGE INDUSTRY

In January-March 2021, in the structure of the gross value added of the transportation and storage industry, the largest share fell on road transport - 58.5% (in January-March 2020 - 53.1%, in January-March 2019 - 50.3%).

Pipeline transport amounted to 17.4% (in January-March 2020 - 18.5%, in January-March 2019 - 22.2%), railway transport - 12.2% (in January-March 2020 - 12, 9%, in January-March 2019 - 12.1%), auxiliary transport activities - 9.5% (in January-March 2020 - 9.9%, in January-March 2019 - 10.3%), air transport - 2.4% (in January-March 2020 - 5.6%, in January-March 2019 - 5.0%) of the total value added of this industry.

Structure of gross added value of transportation and storage for January-March 2019-2021 (in% of the total)

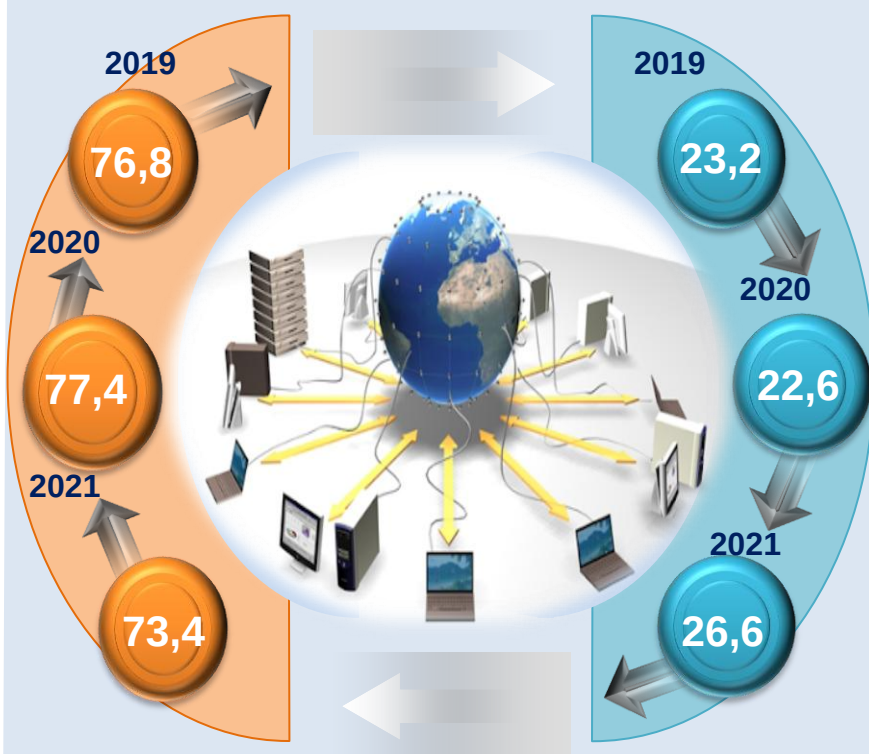

22 GROSS VALUE ADDED IN THE INFORMATION AND COMMUNICATIONS INDUSTRY

In January-March 2021, the share of information and communication in the country's economy amounted to 2.0% (in January-March 2020 - 1.9%). In the structure of the added value of this industry, the main share fell on telecommunications services (wire and mobile communications, the Internet, etc.) and amounted to 73.4% (in January-March 2020 - 77.4%).

The remaining 26.6% of the added value (in January-March 2020 - 22.6%) created in this industry falls on other areas (publishing, computer programming, software development and broadcasting, etc).

GROSS DOMESTIC PRODUCT INDEX DEFLATOR

In January-March 2021, the GDP deflator index amounted to 111.0% in relation to the prices of January-March 2020. The highest values of indices - deflators in the context of industries were noted in agriculture, forestry and fisheries - 115.0%, trade, housing and food services - 113.9%, and construction - 113.5%.

Indices - deflators are lower than, in general, in the economy (111.0%) were observed in industry - 109.7%, transportation and storage, information and communications - 108.6% and other service industries - 110.7%. At the same time, the index-deflator of net taxes on products was 108.0%.

For information: the consumer price index (CPI) in the Republic of Uzbekistan in January-March 2021 to January-March 2020 reached 111.3%, while the CPI for goods was 112.1%, for services - 108.4%.
