

THE PRODUCTION OF THE GROSS DOMESTIC PRODUCT

According to the preliminary estimate, in 2019, the gross domestic product (hereinafter-GDP) of the Republic of Uzbekistan in current prices amounted to 511 838. 1 billion soums and in comparison with 2018, increased in real terms by 5.6 %. The GDP deflator index, relative to 2018 prices, was 119.2 %.

GDP of the Republic of Uzbekistan in 2017-2019
(at current prices, trillion soums)

According to the results of 2019, in the structure of produced GDP, the gross added value of goods production amounted to 300 304.2 billion soums, the services sector – 165 053.2 billion soums, and net taxes on products – 46 480.7 billion soums.

Dynamics of the physical volume index and the GDP deflator index
in 2017-2019
(as % of the previous year)

As the chart illustrates, in 2019, GDP growth accelerated to 5.6% compared to 5.4% in 2018 and 4.5% in 2017, while the growth of the GDP deflator index slowed to 19.2% in 2019 against 27.5% in 2018 and 19.4% in 2017.

GDP – one of the most important indicators of the System of National Accounts, characterizing the final result of the production activities of resident economic units, which is measured by the value of goods and services produced by these units for final use.

The volume index (real growth rate) of GDP is calculated as the ratio of GDP of the reporting period, calculated at constant prices, i.e. at prices of the corresponding period of last year (real GDP), to GDP at current prices of the corresponding period of last year.

The GDP deflator index characterizes the average price change in the economy and is calculated as the ratio of nominal GDP (GDP of the reporting period in current prices) to real GDP.

When calculating in US dollars at the average annual exchange rate of the Central Bank of the Republic of Uzbekistan, GDP in 2019 amounted to 57 907 million USD (in 2018 - 50 397 million USD).

For information: the official US dollar rate to the soum in average annual terms amounted to: in 2018 - 8 069 soums, in 2019 - 8 839 soums.

GDP per capita of the country amounted to 15 242.0 thousand soums (or the equivalent of 1 724 USD) and, compared with 2018, increased in real terms by 3.6%. GDP growth per capita in 2017 and 2018 was 2.7% and 3.6%, respectively.

For information: GDP per capita is determined by dividing its total volume in current prices by the average population of a country over a certain period of time. The average annual resident population of the Republic of Uzbekistan amounted to: 32 389 thousand people in 2017, 32 956 thousand people in 2018, and 33 581 thousand people in 2019.

For information:

According to World Bank estimates, the GDP of the Republic of Uzbekistan at purchasing power parity (PPP) for 2018 amounted to 282.0 billion USD. In other CIS countries, PPP GDP in 2018 is: in the Russian Federation - 4050.8 billion US dollars; Kazakhstan - 509.5 billion US dollars; in Ukraine - 391.0 billion US dollars; in Belarus - 189.7 billion US dollars; Azerbaijan - 179.4 billion US dollars; Turkmenistan - 112.9 billion US dollars; Tajikistan - 31.4 billion US dollars; Armenia - 30.5 billion US dollars; Moldova - 25.8 billion US dollars; Kyrgyzstan - 24.5 billion US dollars.

other service industries	105,9	104,8	105,0

The rate of economic growth in 2019 is due to positive dynamics in the main sectors of the economy. Gross value added generated by all sectors of the economy amounted to 90.9 % of the total GDP and increased by 5.6 % (contribution to GDP growth – 5.0 percentage points). Net taxes on products in the GDP structure amounted to 9.1 % and showed a similar increase of 5.6 % (contribution to GDP growth-0.6 percentage points).

GDP growth rates by economic activity 2017-2019
(as % of the previous year)

At the end of 2019, agriculture, forestry and fisheries showed a positive growth rate of 2.5 %. The contribution of this industry to GDP growth was 0.7 percentage points. The Positive dynamics in agriculture, forestry and fisheries is associated with an increase in crop production by 3.7% and livestock production by 1.7 %.

For information:

According to preliminary data, in 2019, the volume of production in natural terms was as following:

plant growing:

- ✓ grain – 7 187,4 thous. t (or 110.0 % to the level of 2018);
- ✓ vegetables – 9 945,5 thous. t (101,9 %);
- ✓ potato – 2 950,9 thous. t (101,3 %);
- ✓ melon field – 1 922,2 thous. t (104,6 %);
- ✓ fruits and berries – 2 739,6 thous. t (101,2 %);
- ✓ grape – 1 595,2 thous. t (100,3 %).

animal husbandry:

- ✓ meat in live weight – 2 465,0 thous. t (101,4 %);
- ✓ milk – 10 710,8 thous. t (102,3 %);
- ✓ eggs – 7 757,4 bln. pcs. (104,0 %).

In the industry, there is an increase in value added by 6.6%. At the same time, the contribution to GDP growth from industrial production amounted to 1.6 percentage points. The positive dynamics in this industry was ensured mainly due to an increase in the value added of the manufacturing industry by 9.4% (in 2018 - by 7.9%, 2017 - by 4.2%). The added value of the mining industry and quarrying showed a decrease in comparable prices by 1.0% after a noticeable increase in the previous two years (growth in 2018 - by 26.5%, 2017 - by 17.6%).

Volume of gross added value of the industry
in 2017-2019
(at current prices, billion soums)

		2017	2018	2019
	Industry	59 570,4	95 803,9	139 812,8

including:

		2017	2018	2019
	mining and quarrying	10 433,7	20 057,0	30 065,8
	manufacturing industry	43 861,9	68 971,8	100 144,5
	other industries	5 274,8	6 775,1	9 602,5

	Growth rates of gross added value of industry in 2017-2019 (as % of the previous year)
---	---

		2017	2018	2019
	Industry	105,2	110,8	106,6
	<i>including:</i>			
	mining and quarrying	117,6	126,5	99,0
	manufacturing industry	104,2	107,9	109,4
	other industries	96,5	103,9	101,1

Despite the negative dynamics in 2019, in the mining industry and quarrying (a decrease in volumes at comparable prices by 1.0 %), under the influence of price factors, there was an increase in the share of this sector in the structure of the added value of the entire industry to 21.5 % (in 2018 – 20.9 %, in 2017 – 17.5 %). Accordingly, the share of manufacturing in the structure of added value of the entire industry decreased slightly to 71.6 %, compared to 72.0 % in 2018 and 73.6 % in 2017.

Structures of gross added value of industry for 2017-2019
(% of total)

At the end of 2019, the largest share of the gross value added of the manufacturing industry was accounted for by the metallurgical and metal-processing industries (except for machinery and equipment) and amounted to 36.3 %.

The share of production of food, beverages and tobacco products reached 13.8 %, textiles, clothing, leather products and related products-13.4 %, rubber, plastic products and other non-metallic mineral products-9.7 %, chemical products-7.3 %, motor vehicles, trailers, semi-trailers and other transport equipment-6.2 %, electrical equipment-3.2 %, coke and petroleum products-2.5 % and other manufacturing products-7.6 %.

Structure of the gross value added of the manufacturing industry
in 2017-2019
(% of total)

		2017	2018	2019
	Manufacturing industry - total	100,0	100,0	100,0
	Production of food, beverages and tobacco products	21,9	15,4	13,8
	Manufacture of textiles, clothing, leather products and related products	17,7	15,3	13,4
	Production of wood and paper products; printing and replication of recording media	2,7	2,5	2,0
	Production of coke and petroleum products	1,9	2,0	2,5
	Production of chemical products	8,5	8,5	7,3
	Production of basic pharmaceutical products and preparations	1,6	1,0	1,0
	Production of rubber, plastic products and other non-metallic mineral products	11,6	11,1	9,7
	Metallurgical and metal-processing industries (except machinery and equipment)	21,8	28,6	36,3
	Production of computers, electronic and optical products	0,6	0,5	0,8

		2017	2018	2019
	Production of electrical equipment	2,4	3,4	3,2
	Manufacture of machinery and equipment not included in other categories	1,2	1,6	1,5
	Production of motor vehicles, trailers, semi-trailers and other transport equipment	4,2	7,3	6,2
	Manufacture of other finished products; repair and installation of machinery and equipment	3,9	2,8	2,3

For information:

According to preliminary data, in 2019, the volume of production of industrial products produced by large enterprises, in natural terms, amounted to as follows:

- ✓ coal – 4 049,5 thous. t (or 97.0 % to the level of 2018);
- ✓ petroleum – 698,6 thous. t (93,7 %);
- ✓ natural gas – 59 460,0 million cubic meters (98,4 %);
- ✓ condensed gas – 2 098,3 thous. t (97,8 %);
- ✓ crushed stone – 1 244,0 thous. t (75,8 %);
- ✓ gravel – 508,0 thous. t (126,6 %);
- ✓ kaolin – 377,2 thous. t (129,3 %);
- ✓ passenger car – 271 113 pcs. (122,9 %);
- ✓ truck – 5 320 pcs. (125,6 %);
- ✓ automobile engine – 200,6 thous.. pcs. (126,4 %);
- ✓ buses – 1 534 pcs. (161,6 %);
- ✓ tractors – 2 022 pcs. (58,2 %);
- ✓ portland cement – 9 681,1 thous. t (115,9 %);
- ✓ diesel fuel – 1 030,5 thous. t (95,3 %);
- ✓ automobile gasoline – 1 025,1 thous. t (89,4 %);
- ✓ tobacco products – 11 504,0 million. pcs. (105,0 %);
- ✓ electricity – 61 640,7 million kWh (98,7 %);
- ✓ thermal energy – 31 460,9 thous. Gcal (109,5 %).

In comparison with 2018, construction work increased by 19.0 % as a result of large-scale construction of residential complexes, construction and major reconstruction of social and engineering infrastructure facilities, as well as during the implementation of investment projects for the construction and modernization of enterprises in basic industries. The positive contribution to GDP growth from the construction industry was 1.0 percentage points.

For information:

According to preliminary data, the volume of construction work performed by large construction organizations in 2019 amounted to 16 904.6 billion soums (108.5% compared to 2018, the share in the total volume of construction work amounted to 24.6%). Along with this, the volume of construction work carried out by small enterprises and microfirms reached 37 593.5 billion soums (129.5% of the level of 2018, the share in the total volume of construction work - 54.6%). The volume of construction work carried out by individuals amounted to 14 356.3 billion soums (108.3% of the level of 2018, the share in the total volume of construction work - 20.8%).

At the end of 2019, the gross value added of the services sector amounted to 165 053.2 billion soums, and compared with 2018, it increased by 5.1%, which led to a GDP growth of 1.7 percentage points. Including trade services (including vehicle repairs) increased by 4.9%, accommodation and catering services - by 5.9%, transportation and storage - by 4.9%, information and communication - by 8.0% and other services industries - by 5.0%.

In 2019, the largest share in the structure of gross value added of trade (including repair of motor vehicles) was in retail trade (excluding trade in motor vehicles) and amounted to 67.3% (in 2018 - 67.3%, 2017 - 68.2%) The share of wholesale trade (except for trade in motor vehicles) reached 26.0% (in 2018 - 26.2%, 2017 - 26.5%), wholesale and retail trade in motor vehicles and their repair - 6.7% (in 2018 year - 6.5%, 2017 - 5.3%).

Dynamics of the structure of gross added value of trade (including
repair of motor vehicles)
in 2017-2019
(% of total)

In 2019, the largest share in the structure of gross value added of the transportation and storage industry accounted for road transport - 53.3% (in 2018 - 55.5%, 2017 - 63.6%). Pipeline transport amounted to 17.3% (in 2018 - 15.0%, 2017 - 12.7%), railway transport - 11.9% (in 2018 - 11.8%, 2017 - 10.3%), auxiliary transport activities - 10.9% (in 2018 - 11.4%, 2017 - 8.2%), air transport - 6.6% (in 2018 - 6.3%, 2017 - 5, 2%) of the total value added of this industry.

Structure of gross added value of transportation
and storage in 2017-2019
(% of total)

For information:

According to preliminary data, in 2019, all types of transport transported 1 318.9 million tons of cargo, which amounted to 106.1% of the level of 2018. At the same time, freight turnover reached 72.9 billion tons-km, or 102.2% of the level of 2018.

Cargo turnover by types of transport amounted to:

- ✓ railway – 23,5 billion tons-km (or 102.4 % of the level of 2018);
- ✓ air – 0,119 billion tons-km (96,5 %);
- ✓ pipeline – 33,1 billion tons-km (98,4 %);
- ✓ automobile – 16,2 billion tons-km (110,4 %).

In 2019, 6 109.4 million passengers were transported by all types of transport, which amounted to 102.7% of the level of 2018. At the same time, passenger turnover reached 140.9 billion passenger-km, or 104.1% of the level of 2018.

Passenger turnover by mode of transport amounted to:

- ✓ railway – 4,4 billion passenger-km (101,3 %);
- ✓ air – 11,0 billion passenger-km (124,3 %);
- ✓ automobile – 124,9 billion passenger-km (102,7 %);
- ✓ subway – 0,577 billion passenger-km (114,6 %).

Summarizing the above, we can conclude that the largest contribution to GDP growth is made in the service sector (1.7 percentage points), despite its slight decrease over the past two years (in 2018 - 1.8 percentage points, 2017 - 2.3 percentage points).

The industry also made a significant contribution to GDP growth, which amounted to 1.6 percentage points in 2019, while in 2018 this indicator was 2.1 percentage points, in 2017 - 1.0 percentage points.

In such sectors of the economy as “Construction”, “Agriculture, Forestry and Fisheries”, a contribution to the growth of GDP of 2019 at the level of 1.0 percentage points is noted (in 2018 - 0.7 percentage points, in 2017 - 0.3 percentage points) and 0.7 percentage points (in 2018 - 0.1 percentage points, in 2017 - 0.4 percentage points), respectively.

At the end of 2019, due to an increase in net taxes on products, a growth of GDP of 0.6 p.p. was ensured against 0.7 p.p. in 2018 and 0.5 p. p. in 2017.

Contribution of industries to GDP growth
in January-December 2019
(% of total)

At the end of 2019, small businesses created added value in the amount of 262 984.4 billion soums, or 56.5% of the total added value created in the economy.

In terms of the main sectors of the economy, the share of small business in gross value added amounted to: in agriculture, forestry and fisheries - 98.6%, construction - 78.7%, services - 40.7%, industry - 31.1 %

For information:

In 2019, 92.9 thousand new small enterprises and microfirms were created (excluding dekhkan and farm enterprises), which is 1.9 times more than in 2018. The largest number of small enterprises and micro-firms were created in the field of trade (39.1%), industry (21.0%), construction (9.4%), agriculture, forestry and fisheries (8.0%), and the field of accommodation services and food (7.8%), transportation and storage (3.2%).

Share of small business in GDP by type of economic activity
in January-December 2019
(% of GVA)

In 2019, the GDP deflator index was 119.2% relative to prices of the same period in 2018. The highest values of deflator indices in the structure of GDP were noted in industry - 136.9% (in particular in mining and quarrying - 151.4%; manufacturing - 132.7%; other industries - 140.2%) and other services sectors - 128.1%.

Deflator indices are lower than in the economy as a whole (119.2%) were observed in agriculture, forestry and fisheries - 112.1%, construction - 113.7%, trade, accommodation and catering services - 114.7 %, transportation and storage, information and communications - 110.8% and in net taxes on products - 96.6%.
