

THE STATE COMMITTEE OF THE REPUBLIC OF UZBEKISTAN ON STATISTICS

PRODUCTION OF GROSS DOMESTIC PRODUCT OF THE REPUBLIC OF UZBEKISTAN FOR 2022

2013 2014 2015 2016 2017 2018

Tashkent-2023

PRODUCTION OF GROSS DOMESTIC PRODUCT

Gross domestic product (GDP) of the Republic of Uzbekistan for 2018-2022¹

In accordance with a preliminary estimate, in 2022, the GDP of the Republic of Uzbekistan at current prices amounted to 888 341.7 billion soums and, compared to 2021, increased in real terms by 5.7%. The GDP deflator index, in relation to the prices of 2021, amounted to 113.8%.

■ Volume of GDP, billion soums ■ GDP growth rates, in %

Gross domestic product (GDP) is one of the most important indicators of the System of National Accounts (SNA), characterizing the final result of the production activity of resident economic units, which is measured by the value of goods and services produced by these units for final use.

GDP of the Republic of Uzbekistan for 2018-2022 (at current prices, trillion soums)

■ Production of goods

■ Service sector

■ Net taxes on products

¹Hereinafter, data for 2018-2021 are given with clarifications

PRODUCTION OF GROSS DOMESTIC PRODUCT

GDP of the Republic of Uzbekistan for 2018-2022 (billion US dollars)

For reference: in 2022, the official exchange rate of the US dollar against the soum averaged 11051.2 soums, in 2021 – 10610.0 soums, in 2020 – 10055.8 soums, in 2019 – 8839.0 soums, in 2018 – 8068.9 soums.

When calculated in US dollars at the average exchange rate for the reporting period, nominal GDP amounted to 80 384.0 million US dollars.

Growth (decrease) rates of GDP of the CIS countries², in % to the corresponding period of the previous year

²Based on data obtained from the official websites of national statistical services

other service industries	105,5	106,7	101,4	106,3	106,6
net taxes on products	105,9	104,7	101,6	104,6	99,2

The index of physical volume (real growth rates) of GDP is calculated as the ratio of the GDP of the reporting period, calculated at constant prices, i.e. in prices of the corresponding period of the previous year (real GDP) to GDP in current prices of the corresponding period of the previous year.

PRODUCTION OF GROSS DOMESTIC PRODUCT

Contribution of industries to GDP growth in 2018-2022 (in % of the total)

A positive contribution to GDP growth was made by the sectors of agriculture, forestry and fisheries – 0.9 p.p., industry – 1.3 p.p., construction – 0.4 p.p. and services – 3.2 p.p. Due to the reduction of net taxes on products, GDP decreased by 0.1 p.p.

PRODUCTION OF GROSS DOMESTIC PRODUCT

Structure of GDP by types of economic activity for 2018-2022 (in % of the total)

	2018	2019	2020	2021	2022
I. GDP, total	100,0	100,0	100,0	100,0	100,0
<i>including:</i>					
gross value added of industries	89,3	91,5	92,7	93,0	93,2
net taxes on products	10,7	8,5	7,3	7,0	6,8
II. Gross value added of industries	100,0	100,0	100,0	100,0	100,0
agriculture, forestry and fisheries	29,7	26,6	26,8	26,5	25,1
industry (including construction)	30,5	33,8	33,5	33,9	33,4
industry	24,7	27,5	26,8	27,3	26,7
construction	5,8	6,2	6,7	6,6	6,7
services	39,8	39,6	39,7	39,6	41,5
trade, accommodation and catering services	7,0	6,6	6,5	6,8	7,0
transportation and storage, information and communication	7,9	7,4	6,8	7,0	7,0
other service industries	24,9	25,6	26,4	25,8	27,5

At the end of 2022, insignificant changes were noted in the sectoral structure of GDP. Thus, the share of the service sector in the sectoral structure of GDP (GVA) increased from 39.6% to 41.5%, construction - from 6.6% to 6.7%, while the share of agriculture, forestry and fisheries decreased from 26.5% to 25.1%, industry - from 27.3% to 26.7%.

GDP per capita for 2018-2022 (at current prices, thousand soums)

GDP per capita growth rate for 2018-2022 (in % to the previous year)

In 2022, GDP per capita at current prices amounted to 24 919.7 thousand soums (or, in equivalent, 2 254.9 US dollars).

For reference: the average number of permanent population of the Republic of Uzbekistan was: in 2018 - 32956.1 thousand people, in 2019 - 33580.4 thousand people, in 2020 - 34232.1 thousand people, in 2021 - 34915.1 thousand people, in 2022 - 35648.1 thousand people.

As it is clear from the presented infographic, in 2022, the growth of GDP per capita in real terms, compared to 2021, amounted to 3.5%, and compared to 2018 - 13.4%.

GDP (GRP) per capita is determined by dividing the total GDP (GRP) at current prices by the average population of the country (region) for a certain period of time.

GROSS VALUE ADDED FROM AGRICULTURE, FORESTRY AND FISHERIES

Gross value added of agriculture, forestry and fisheries for 2018-2022

According to the results of 2022, **agriculture, forestry and fisheries** demonstrated positive growth rates at the level of 3.6% (in 2021 – 4.0%, in 2020 – 2.9%, in 2019 – 3.1%, in 2018 – 0.3%).

The positive dynamics in this industry is due to the growth of livestock production by 3.4% (in 2021 – 3.5%, 2020 – 2.1%, 2019 – 1.6%, 2018 – 5.7%) and crop production by 3.8% (in 2021 – an increase of 4.3%, 2020 – an increase of 3.2 %, in 2019 – an increase of 4.8%, in 2018 – a decrease of 4.2%).

GROSS VALUE ADDED BY THE INDUSTRY

Gross value added of industry for 2018-2022

At the end of 2022, the industry saw an increase in value added by 5.2%. The positive dynamics in this industry was mainly due to the growth in the value added of the mining and quarrying industry by 2.1% and the manufacturing industry by 5.3%. The electricity, gas, steam and air conditioning industry also showed positive growth of 12.7%. The value added of water supply, sewerage, waste collection and disposal showed a decrease of 8.0%.

GROSS VALUE ADDED OF THE INFORMATION AND COMMUNICATION INDUSTRY

Gross value added of information and communication for 2018-2022

Structure of the gross value added of information and communications for 2018-2022 (in % of the total)

GROSS VALUE ADDED IN THE INFORMATION AND COMMUNICATION TECHNOLOGY SERVICES INDUSTRY

In 2022, the share of **information and communications** in the country's economy was 1.8%.

In the value added structure of this industry, the main share fell on communication services (wire and mobile communication services, the Internet, etc.) and amounted to 61.7%.

The remaining 38.3% of the added value created in this industry comes from other areas (publishing, computer programming, programming and broadcasting, etc.).

**Gross value added of ICT services
for 2020-2022, billion soums**

**Share of ICT services in GDP
for 2020-2022, in % of GVA**

In 2022, the share of **information and communication technology (ICT)** services in the country's economy was 1.7%.

The added value of ICT services consists of communication services – 66.5%, computer programming, consultations and other related services – 19.4%, data placement and processing services, Web portals – 7.0%, computer and communication equipment repair – 4.7%, software release – 2.4%.

Construction

9,5 %

Services

32,9 %

At the end of 2022, **small entrepreneurship (businesses)** created added value in the amount of 429 292.7 billion soums, or 51.8% of the total value added in the economy. At the same time, the share of agriculture, forestry and fisheries in the total GVA of small entrepreneurship (business) amounted to 46.6%, industry - 11.0%, construction - 9.5% and services - 32.9%.

GROSS VALUE ADDED OF SMALL ENTREPRENEURSHIP (BUSINESS)

The share of small entrepreneurship (business) in GDP by type of economic activity for 2022
(in % to the GVA)

For information: in 2022, 90.2 thousand new small enterprises and microfirms were created in the Republic (excluding dehkan and farm enterprises). The largest number of them was created in trade (38.1%), industry (18.0%), agriculture, forestry and fisheries (13.3%), accommodation and food services (6.4%), construction (5.3%), transportation and storage (3.7%), information and communications (2.9%).

INDEX-DEFLATOR OF GROSS DOMESTIC PRODUCT

Dynamics of the GDP deflator index by type of economic activity for 2018-2022 (in % to the previous year)

Other service industries

Net taxes on products

In 2022, the GDP **deflator index** was 113.8% compared to 2021 prices. The highest values of deflator indices in the context of industries were noted in construction – 114.3% and other service industries – 120.5%.

Deflator indices are lower than, in general, for the economy (113.8%), were observed in trade, accommodation and food services – 113.1%, industry – 112.2%, agriculture, forestry and fisheries – 110.7%, transportation and storage, information and communications – 105.1%.

At the same time, the deflator index of net taxes on products amounted to 116.9%.

GDP deflator index characterizes the average change in prices in the economy and is calculated as the ratio of nominal GDP (GDP of the reporting period at current prices) to real GDP.

For information: The consumer price index (CPI) in Uzbekistan for 2022 compared to 2021 reached 111.4%, while the CPI for goods amounted to 112.8%, for services - 107.0%. During the period under review, compared to 2021, food prices increased by 15.1%, non-food products - by 9.9%.
