PRODUCTION OF GROSS DOMESTIC PRODUCT

GDP is one of the most important indicators of the System of National Accounts, which characterizes the final result of the production activity of resident economic units, which is measured by the value of goods and services produced by these units for final use.

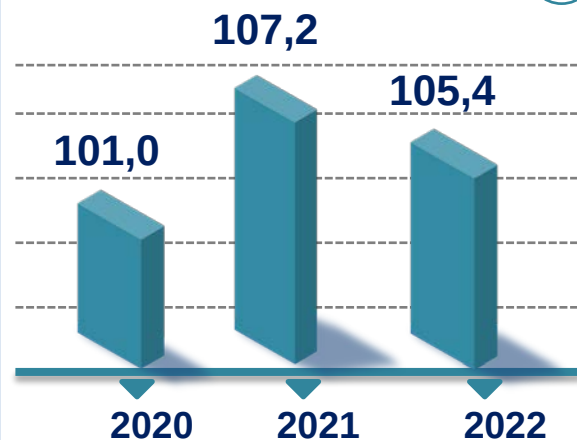

At the same time, the GDP deflator index increased to 115.2% after 112.5% in January-June 2021. In the same period of 2020, the GDP deflator index amounted to 113.6%.

GDP deflator index for January-June 2020-2022 (in % to the corresponding period of the previous year)

The **GDP deflator index** characterizes the average change in prices in the economy and is calculated as the ratio of nominal GDP (GDP of the reporting period at current prices) to real GDP.

GDP growth rates for January-June 2020-2022 (in % to the corresponding period of the previous year)

In January-June 2022, GDP growth amounted to 105.4%. In January-June 2021, it accelerated to 7.2% against 1.0% in January-June 2020.

The **index of physical volume (real growth rates) of GDP** is calculated as the ratio of the GDP of the reporting period, calculated in constant prices, i.e. in prices of the corresponding period of the last year (real GDP) to GDP in current prices of the corresponding period of the previous year.

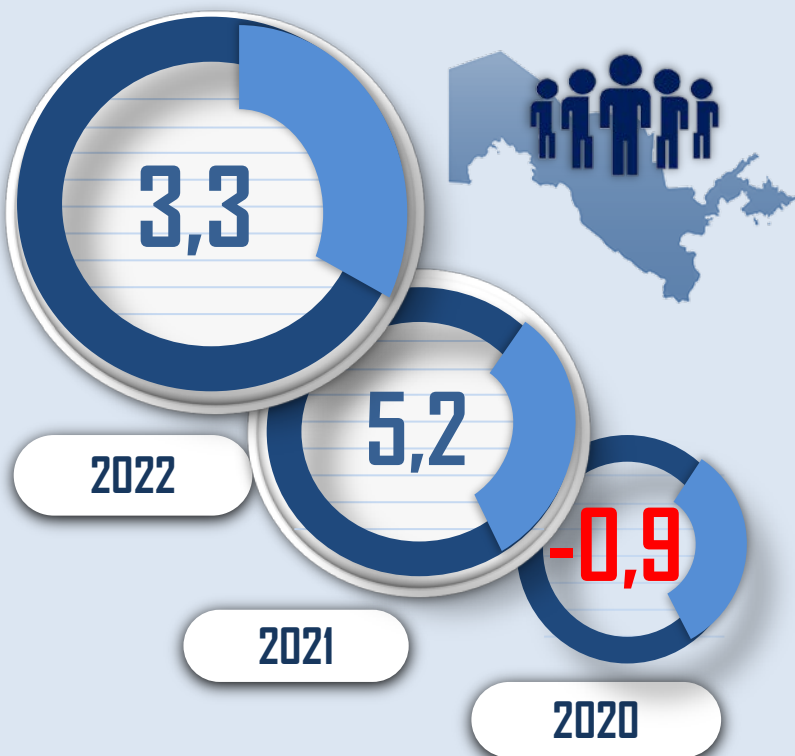

PRODUCTION OF GROSS DOMESTIC PRODUCT

For reference: in January-June 2022, the official exchange rate of the US dollar against the soum averaged 11 046.9 soums, in January-June 2021 – 10 524.5 soums, January-June 2020 – 9 790.2 soums.

As can be seen from the infographic below, in January-June 2022, GDP per capita growth in real terms was 3.3%. In January-June 2020, it decreased by 0.9% against an increase in January-June 2021 by 5.2%.

Real GDP per capita growth rates for January-June 2020-2022 (in % to the corresponding period of the previous year)

GDP per capita for January-June 2020-2022 (at current prices, thousand soums)

For reference: GDP per capita is determined by dividing its total volume at current prices by the average population of the country for a certain period of time. The average number of resident population of the Republic of Uzbekistan was: in January-June 2020 – 34 049.6 thousand people, in January-June 2021 – 34 709.5 thousand people, in January-June 2022 – 35 437.4 thousand people.

collection and
disposal

In the industry, there is an increase in value added by 5.1%. The positive dynamics in this industry is mainly due to the growth in the value added of the manufacturing industry by 5.4% (in January-June 2021 - 9.4%, January-June 2020 - 3.7%) and electricity, gas, steam and air conditioning by 14.7% (in January-June 2021 - 6.9%, January-June 2020 - 7.9%).

In the value added of the mining industry and quarrying, a decrease of 0.5% was noted (in January-June 2021 - an increase of 7.1%, in January-June 2020 - a decrease of 18.1%), as well as water supply, sewerage, collection and disposal of waste by 11.6% (in January-June 2021 - an increase of 0.3%, in January-June 2020 - a decrease of 11.2%).

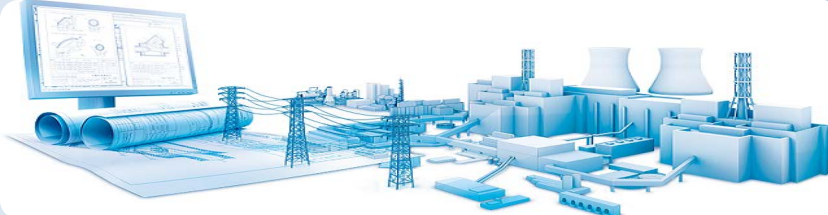

GROSS VALUE ADDED OF THE INDUSTRY

According to the results of January-June 2022, the share of **transportation and storage** in the GDP of the Republic of Uzbekistan amounted to 5.4%.

In the structure of the gross value added of the transportation and storage industry, the largest share fell on road transport - 59.0% (in January-June 2021 - 60.6%, January-June 2020 - 54.5%).

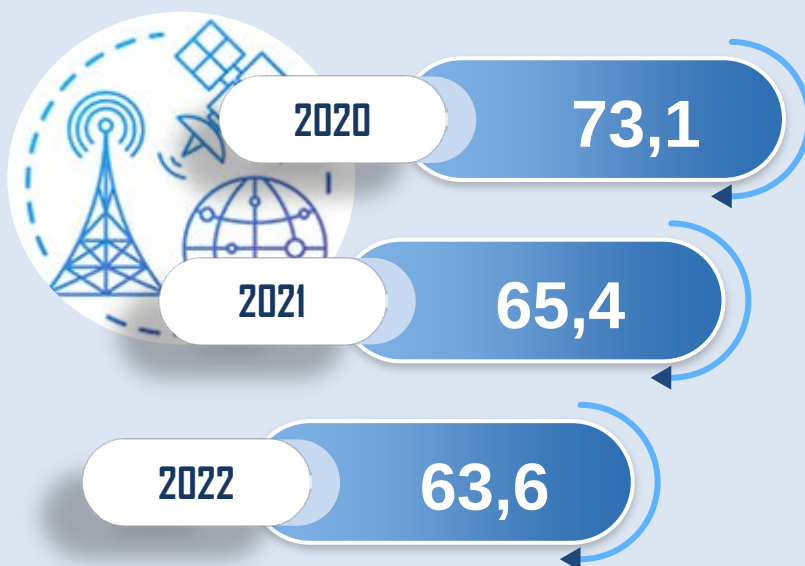

Pipeline transport amounted to 10.7% (in January-June 2021 - 13.9%, January-June 2020 - 19.0%), railway transport - 10.9% (in January-June 2021 - 12.0%). %, January-June 2020 - 14.2%), auxiliary transport activities - 12.4% (in January-June 2021 - 10.1%, January-June 2020 - 8.7%), air transport - 7.0% (in January-June 2021 - 3.4%, January-June 2020 - 3.6%) of the total value added of this industry.

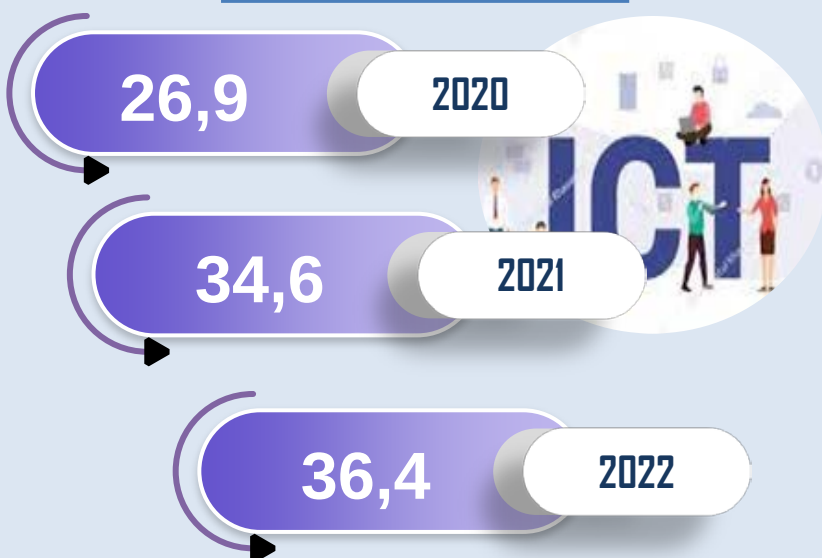

GROSS VALUE ADDED IN THE INFORMATION AND COMMUNICATIONS INDUSTRY

The structure of the gross value added
of information and communication
for January-June 2020-2022
(in % of total)

Telecommunication services

Other services

In January-June 2022, the share of information and communications in the country's economy amounted to 1.9% (in January-June 2021 - 1.9%).

In the value added structure of this industry, the main share fell on telecommunications services (wire and mobile communication services, the Internet, etc.) and amounted to 63.6% (in January-June 2021 - 65.4%).

The remaining 36.4% of the value added (in January-June 2021 – 34.6%) created in this industry fall on other areas (publishing, computer programming, programming and broadcasting, etc.).

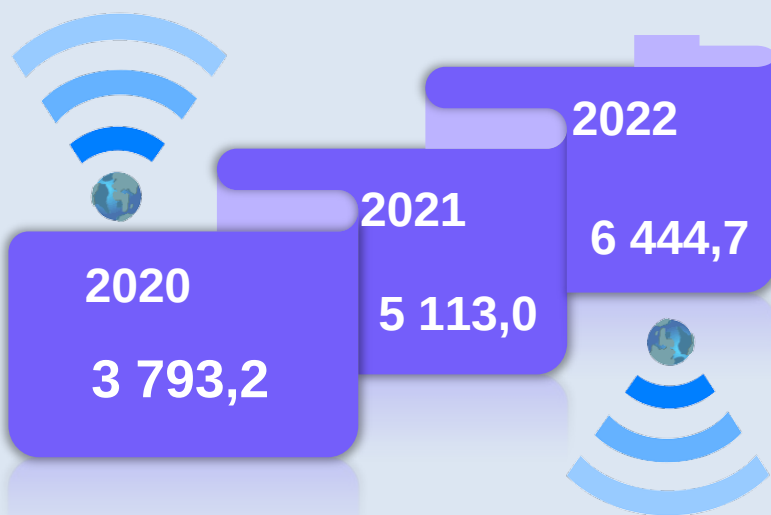

GROSS VALUE ADDED IN THE INFORMATION AND COMMUNICATION TECHNOLOGY SERVICES INDUSTRY

Communication and informatization services cover services in the field of communications, including the transmission of sound information, images and other information flows using telephone, telex, telegraph, radio broadcasting, e-mail, satellite, facsimile, etc.

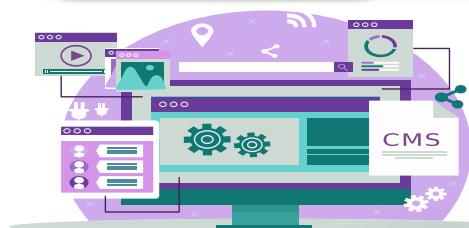

In January-June 2022, the share of information and communication technology (ICT) services in the country's economy amounted to 1.8% (in January-June 2021 - 1.7%, January-June 2020 - 1.5%).

Gross value added of ICT services for January-June 2020-2022 (at current prices, billion soums)

Share of ICT services in GDP for January-June 2020-2022 (in % of GVA)

The value added of ICT services consists of communication services - 68.3%, computer programming, consulting and other related services - 18.2%, data hosting and processing services, Web portals - 6.1%, repair of computers and communication equipment - 4.8%, software release - 2.6%.

GROSS VALUE ADDED OF SMALL ENTERPRISES (BUSINESS)

**The share of sectors in the formation
of GVA in small business
for January-June 2022**
(in % of the total)

According to the results of January-June 2022, small businesses created added value in the amount of 180 234.5 billion soums, or 50.5% of the total value added in the economy. At the same time, the share of agriculture, forestry and fisheries in the total GVA of small businesses was 41.2%, industry - 11.4%, construction - 11.1% and services - 36.3%.

The share of small business (business) in the main sectors of the economy was: in agriculture, forestry and fisheries - 97.4%, construction - 77.7%, services - 43.5% and industry - 19.6%.
