

PRODUCTION OF GROSS DOMESTIC PRODUCT

(January-September 2020)

According to preliminary estimates, in January-September 2020, the gross domestic product (hereinafter - GDP) of the Republic of Uzbekistan at current prices amounted to 408 296.6 billion soums and, compared to the same period in 2019*, increased by 0.4% in real terms. The GDP deflator index, in relation to the prices of January-September 2019, amounted to 111.8%.

GDP of the Republic of Uzbekistan in January-September 2018-2020
(at current prices, trillion soums)

According to the results of January-September 2020, in the structure of GDP produced, the gross added value of the production of goods amounted to 240 326.7 billion soums, the service sector - 136 403.9 billion soums, and net taxes on products - 31 566.0 billion soums.

Dynamics of the physical volume index and the GDP deflator index in January-September 2018-2020
(in % to the corresponding period of the previous year)

* Hereinafter, data for January-September 2018 and 2019 are given with clarifications

As the chart above illustrates, in January-September 2020, GDP growth slowed to 0.4% versus 5.9% in January-September 2019 and 5.7% in January-September 2018. At the same time, a slowdown in the GDP deflator index to 111.8% was noted after 118.5% in January-September 2019 and 130.5% in January-September 2018.

GDP is one of the most important indicators of the System of National Accounts, which characterizes the final result of the production activity of resident economic units, which is measured by the value of goods and services produced by these units for final use.

The physical volume index (real growth rates) of GDP is calculated as the ratio of the GDP of the reporting period, calculated in constant prices, i.e. at prices of the corresponding period of the last year (real GDP) to GDP at current prices of the corresponding period of the last year.

The GDP deflator index characterizes the average change in prices in the economy and is calculated as the ratio of nominal GDP (GDP of the reporting period in current prices) to real GDP.

When calculated in US dollars at the average exchange rate for the period under review, nominal GDP totaled 41 072.2 million US dollars (in January-September 2019 42 220.1 million US dollars).

***For reference:** in January-September 2020, the official exchange rate of the US dollar in relation to the soum averaged 9 940.9 soums, in January-September 2019 – 8 621.4 soums.*

GDP per capita of the country amounted to 11 958 thousand soums (or equivalent - 1 203 US dollars).

***For reference:** GDP per capita is determined by dividing its total volume at current prices by the average population of the country for a certain period of time. The average resident population of the Republic of Uzbekistan was: in January-September 2018 - 32 871 thousand people, January-September 2019 - 33 490 thousand people, January-September 2020 - 34 144 thousand people.*

GDP per capita in January-September 2018-2020 (at current prices, thousand soums)

Real growth rate of GDP per capita in January-September 2018-2020 (in % to the corresponding period of the previous year)

As the above chart demonstrates, in January-September 2020, GDP per capita in real terms decreased by 1.5% versus growth by 3.9% in January-September 2019.

GDP production by type of economic activity in January- September 2018-2020

	2018		2019		2020	
	<i>Billion soums</i>	<i>Growth rate, %</i>	<i>Billion soums</i>	<i>Growth rate, %</i>	<i>Billion soums</i>	<i>Growth rate, %</i>
GDP	290 002,0	105,7	363 997,3	105,9	408 296,6	100,4
<i>including:</i>						
Gross value added of industries	256 556,4	105,6	331 229,9	105,8	376 730,6	100,5
Agriculture, forestry and fisheries	79 582,8	100,8	90 417,4	102,2	104 906,8	103,4
Industry	67 667,9	109,5	97 042,9	105,3	107 427,3	97,3
Construction	16 307,0	117,0	23 011,6	124,2	27 992,6	108,6
Trade, accommodation and catering services	19 475,2	105,2	24 329,6	106,8	27 446,3	98,7
Transport and storage, information and communication	22 105,7	107,4	26 329,6	108,1	27 520,2	98,2
Other service industries	51 417,8	105,6	70 098,8	105,0	81 437,4	100,0
Net taxes on products	33 445,6	106,3	32 767,4	106,2	31 566,0	99,4

The gross value added created by all sectors of the economy amounted to 92.3% of the total GDP and increased by 0.5% (contribution to GDP growth - 0.4 percentage points). Net taxes on products in the structure of GDP amounted to 7.7% and decreased by 0.6% (negative contribution to GDP growth - 0.04 percentage points).

GDP growth rates by type of economic activity in January- September 2020 *(in % to the corresponding period of the previous year)*

The sectors of agriculture, forestry and fisheries made a positive contribution to GDP growth - 0.8 p.p. (in January-September 2019 - 0.6 p.p.) and construction - 0.5 p.p. (in January-September 2019 - 1.4 p.p.).

Industry and the service sector made a negative contribution to GDP growth, which in January-September 2020 amounted to 0.7 p.p. and - 0.2 p.p., respectively. In January-September 2019, the contribution of industry to GDP growth was 1.2 p.p., the service sector - 2.0 p.p.

Due to the decrease in net taxes on products, GDP fell by 0.04 percentage points. In the same period of 2019, net taxes on products made a positive contribution to GDP growth, which amounted to 0.7 p.p.

Contribution of industries to GDP growth in January- September 2020 (in % of the total)

Structure of GDP by type of economic activity in January- September 2018-2020 (in % of the total)

	2018	2019	2020
I. GDP, total	100,0	100,0	100,0
<i>including:</i>			
Gross value added of industries	88,5	91,0	92,3
Net taxes on products	11,5	9,0	7,7
II. Gross value added of industries	100,0	100,0	100,0
Agriculture, forestry and fisheries	31,0	27,3	27,9
Industry (including construction)	32,8	36,2	35,9
industry	26,4	29,3	28,5
construction	6,4	6,9	7,4

	2018	2019	2020
Services	36,2	36,5	36,2
trade, accommodation and catering services	7,6	7,3	7,3
transportation and storage, information and communication	8,6	8,0	7,3
other service industries	20,0	21,2	21,6

In January-September 2019, compared to the corresponding period of 2018, significant shifts were noted in the structure of GDP, characterized by a decrease in the share of agriculture, forestry and fisheries to 27.3% (in January-September 2018 - 31.0%) and an increase in the share of industry to 29.3% (in January-September 2018 - 26.4%).

Sectoral structure of GDP in January-September 2020 (in % of the total)

At the end of January-September 2020, insignificant changes are noted in the sectoral structure of GDP. Thus, the share of agriculture, forestry and fisheries in the sectoral structure of GDP (GVA) increased from 27.3% to 27.9%, construction - from 6.9% to 7.4%, while the share of industry decreased from 29.3% to 28.5%, services - from 36.5% to 36.2%.

At the end of January-September 2020, agriculture, forestry and fisheries showed positive growth rates of 3.4%. The positive dynamics in agriculture, forestry and fisheries is due to an increase in crop production by 4.3% (in January-September 2019 - an increase of 2.3%, in January-September 2018 - a decline of 3.3%) and animal husbandry - by 2.3% (in January-September 2019 - an increase of 2.6%, in January-September 2018 - an increase of 5.6%).

For information: according to preliminary data, in January-September 2020, the volume of production in physical terms and the growth rate amounted to:

	Grain	6 667,1 thous.tons	102,4 %	
	Vegetables	7 630,4 thous.tons	102,7 %	
	Potatoes	2 432,7 thous.tons	101,6 %	
	Melons	1 389,6 thous.tons	104,2 %	
	Fruit	2 065,1 thous.tons	103,9 %	
	Meat in live weight	1 836,0 thous.tons	102,2 %	
	Milk	7 933,1 thous.tons	102,9 %	
	Eggs	5 434,6 million pcs.	100,8 %	
	Live fish	59,9 thous.tons	109,8 %	

In the industry, there is a decrease in value added at comparable prices by 2.7%. The negative dynamics in this industry was mainly due to a decrease in the added value of the mining and quarrying industry by 26.1% after significant growth in the previous two years (growth in January-September 2019 - by 2.8%, in January-September 2018 years - by 22.0%). At the same time, the decrease in the added

value of this industry was mainly influenced by a decrease in natural gas production by 19.6% and gas condensate by 34.7%.

The value added in the manufacturing industry increased in real terms by 2.7% (in January-September 2019 - by 6.2%, in January-September 2018 - by 7.4%).

The electricity, gas, steam and air conditioning industry also showed positive growth of 13.7% versus 5.1% growth in January-September 2019 and 0.8% in January-September 2018. In terms of the added value of water supply, sewerage, waste collection and disposal, a decrease of 7.3% was noted (in January-September 2019 - a decrease by 3.5%, in January-September 2018 - an increase by 9.3%).

Dynamics of gross value added in industry in January-September 2018-2020

	2018		2019		2020	
	Billion soums	Growth rates, %	Billion soums	Growth rates, %	Billion soums	Growth rates, %

Structure of gross value added in industry in January- September 2018-2020 (in % of the total)

The share of manufacturing in the structure of value added in the industrial sector increased to 75.8% against 70.1% in January-September 2019. Accordingly, there was a decrease in the share of the mining industry and quarrying in the structure of value added in the industrial sector to 15.4% (in January-September 2019 - 22.9%).

At the end of January-September 2020, the largest share in the structure of value added in the manufacturing industry fell on the metallurgical and metal-processing industry (except for machinery and equipment), which reached 41.9%.

The share of the production of food, beverages and tobacco products was 13.4%, textiles, clothing, leather and related products - 11.6%, rubber, plastic products and other non-metallic mineral products - 9.1%, chemical products - 7.5%, motor vehicles, trailers, semi-trailers and other transport equipment - 6.0%, coke and petroleum products - 2.4%, electrical equipment - 1.7% and other manufacturing products - 6.4%.

Structure of gross value added in the manufacturing industry for January-September 2018-2020 *(in % of the total)*

		2018	2019	2020
	Manufacturing industry, total	100,0	100,0	100,0
	Food, beverage and tobacco manufacturing	15,3	14,2	13,4
	Manufacture of textiles, clothing, leather products and related products	14,4	12,2	11,6

For information: according to preliminary data, in January-September 2020, the volume of industrial production produced by large enterprises in physical terms amounted to:

	Coal	2 635,9 thous.tons	97,1 %	
	Petroleum	553,4 thous.tons	105,4 %	
	Natural gas	36 077,4 million cubic meters	80,4 %	
	Gas condensate	1 022,7 thous.tons	65,3 %	
	Crushed stone	1 432,5 thous.tons	97,7 %	
	Passenger cars	217 771 pcs.	116,8 %	
	Trucks	2 936 pcs .	72,9 %	
	Automotive engines	174,5 thous. pcs .	124,4%	
	Buses	519 pcs .	38,8 %	
	Tractors	630 pcs .	57,3 %	
	Portland cement	7 753,4 thous.tons	102,6 %	

	Diesel fuel	723,4 thous.tons	94,8 %	
	Automobile gasoline	769,1 thous.tons	101,4 %	
	Cotton yarn	326,3 thous.tons	107,3 %	
	Tobacco products	8 032,0 mln. pcs.	98,7 %	
	Electricity	46 391,5 million kWh	103,5 %	
	Heat energy	18 941,5 thous. Gcal	99,8 %	

Compared to January-September 2019, construction work increased by 8.6%, while the growth rate of construction of buildings and structures amounted to 110.1% (in January-September 2019 - 122.0%, in January-September 2018 - 110.6%), civil construction - 105.0% (in January-September 2019 - 145.5%, in January-September 2018 - 138.9%) and specialized construction works - 104.5% (in January-September 2019 - 115.3%, in January-September 2018 - 139.2%).

Dynamics of the gross added value of construction in January-September 2018-2020

	2018		2019		2020	
	Billion soums	Growth rate, %	Billion soums	Growth rate, %	Billion soums	Growth rate, %
Construction - total	16 307,0	117,0	23 011,6	124,2	27 992,6	108,6
including:						
construction of buildings and structures	11 883,8	110,6	16 541,6	122,0	20 345,4	110,1
construction of civil facilities	2 088,1	138,9	3 428,0	145,5	4 055,2	105,0
specialized construction work	2 335,1	139,2	3 042,0	115,3	3 592,0	104,5

For information: in January-September 2020, the volume of construction work amounted to 65,154.6 billion soums. Large organizations account for 27.9% of the total volume of construction work, small enterprises and microfirms - 54.8%, individuals - 17.3%.

At the end of January-September 2020, the gross value added of the service sector amounted to 136 403.9 billion soums and, compared to the same period in 2019, decreased by 0.7%. Including: transportation and storage services decreased by 6.5%, accommodation and catering - by 17.0%. Along with this, trade services (including repair of vehicles) increased by 0.4%, information and communication - by 16.9%.

Dynamics of the structure of gross value added of trade (including repair of motor vehicles) in January-September 2018-2020 (in % of the total)

Wholesale and retail trade in motor vehicles and their repair

Wholesale trade (except for trade in motor vehicles)

Retail trade (except for trade in motor vehicles)

In January-September 2020, in the structure of gross value added of trade (including repair of motor vehicles), the largest share fell on retail trade (excluding trade in motor vehicles) and reached 67.9% (in January-September 2019 - 66.7%). The share of wholesale trade (excluding trade in motor vehicles) amounted to 26.0% (in January-September 2019 - 26.7%), wholesale and retail trade in motor vehicles and their repairs - 6.1% (in January-September 2019 - 6.6%).

In January-September 2020, in the structure of gross value added in the transportation and storage, the largest share fell on road transport - 59.6% (in January-September 2019 - 52.8%). Pipeline transport amounted to 15.8% (in January-September 2019 - 18.3%), rail transport - 13.1% (in January-September 2019 - 11.5%), supporting transport activities - 8.9% (in January-September 2019 - 11.3%), air transport - 2.6% (in January-September 2019 - 6.1%) of the total value added of this industry.

Structure of the gross value added of information and communication in January-September 2018-2020
(in % of the total)

● Telecommunication services
● Other

In January-September 2020, the share of information and communication in the country's economy amounted to 1.7% (in January-September 2019 - 1.6%). In the structure of the added value of this industry, the main share fell on telecommunications services (wire and mobile communications, Internet, etc.) and amounted to 75.0% (in January-September 2019 - 76.3%). The remaining 25.0% of the added value (in January-September 2019 - 23.7%) created in this industry falls on other areas (publishing, computer programming, programming and broadcasting, etc.).

In January-September 2020, small entrepreneurship (businesses) created added value in the amount of 204,287.6 billion soums. At the same time, the share of agriculture, forestry and fisheries in the total GVA of small entrepreneurship (business) was 50.4%, industry - 12.1%, construction - 10.4% and services - 27.1%.

Share of industries in the formation of GVA in small entrepreneurship (business) in January-September 2020 (in % of the total)

Small entrepreneurship (business) created 54.2% of the total value added in the economy. By the main sectors of the economy, this indicator was: in agriculture, forestry and fisheries - 98.2%, construction - 75.9%, services - 40.5% and industry - 23.1%.

For information: in January-September 2020, 70.3 thousand new small enterprises and microfirms were created in the republic (excluding dekhkan and farms). The largest number of them was created in trade (37.0%), industry (20.7%), agriculture, forestry and fisheries (16.9%), construction (6.7%), accommodation and food services. (5.5%), transportation and storage (2.5%).

Share of small entrepreneurship (business) in GDP by type of economic activity in January-September 2020 (in % of GVA)

In January-September 2020, the GDP deflator index amounted to 111.8% in relation to prices for the same period in 2019. The highest values of indexes - deflators in the context of industries were noted in trade, accommodation and food services - 114.3%, industry - 113.8%, agriculture, forestry and fisheries - 112.3%, construction - 112.0% and other service industries - 116.2%.

Indexes - deflators are lower than, in general, in the economy (111.8%) were observed in transportation and storage, information and communications - 106.4%. At the same time, the deflator index of net taxes on products was 96.9%.

For information: the consumer price index (CPI) in the Republic of Uzbekistan in January-September 2020 reached 113.5% compared to the corresponding period of 2019, while the CPI of goods was 113.9%, for services - 112.1%.
