2021*

Tashkent 2021

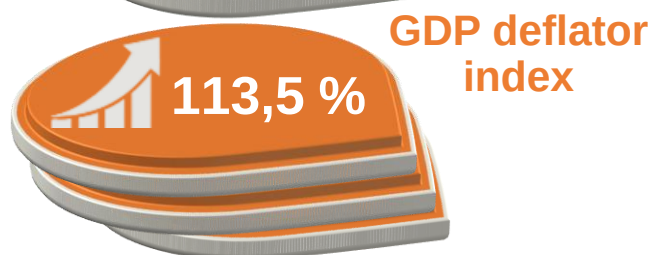

PRODUCTION OF GROSS DOMESTIC PRODUCT

Gross Domestic Product (GDP) of the Republic of Uzbekistan for January-September 2021

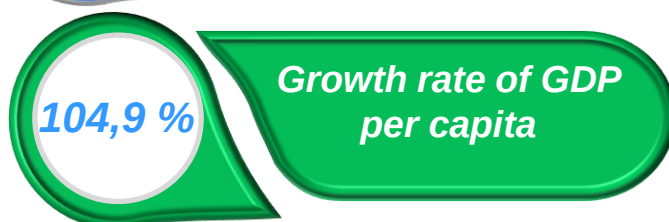

According to a preliminary estimate, in January-September 2021, the GDP of the Republic of Uzbekistan in current prices amounted to 519 825.1 billion soums and, compared to January-September 2020, increased in real terms by 6.9%. The GDP deflator index, in relation to the prices of January-September 2020, amounted to 113.5%.

GDP per capita for January-September 2021

In January-September 2021, GDP per capita in current prices amounted to 14 929.4 thousand soums (or, in equivalent, 1 402.3 USD) and, compared to January-September 2020, increased by 4.9%.

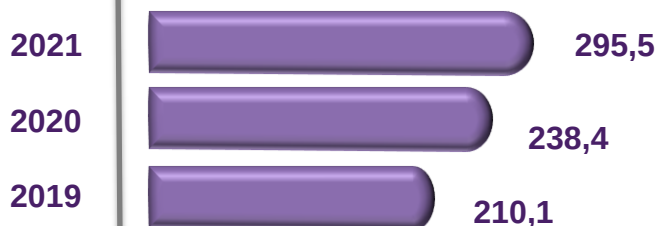

PRODUCTION OF GROSS DOMESTIC PRODUCT

GDP of the Republic of Uzbekistan for January-September 2019-2021 * (at current prices, trillion soums)

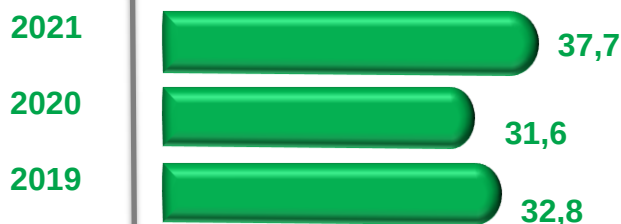

Production of goods

Services sector

Net taxes on products

According to the results of January-September 2021, in the structure of the GDP produced, the gross value added of the production of goods amounted to 295 482.7 billion soums, the services sector – 186 616.8 billion soums, and net taxes on products – 37 725.6 billion soums.

Calculated in US dollars at the average exchange rate for the reporting period, nominal GDP was formed in the amount of 48 827.8 million US dollars (for January-September 2020 – 43 068.1 million US dollars).

For reference: in January-September 2021, the official exchange rate of the US dollar in relation to the soum averaged 10 646.1 soums, in the same period of 2020 - 9 940.9 soums.

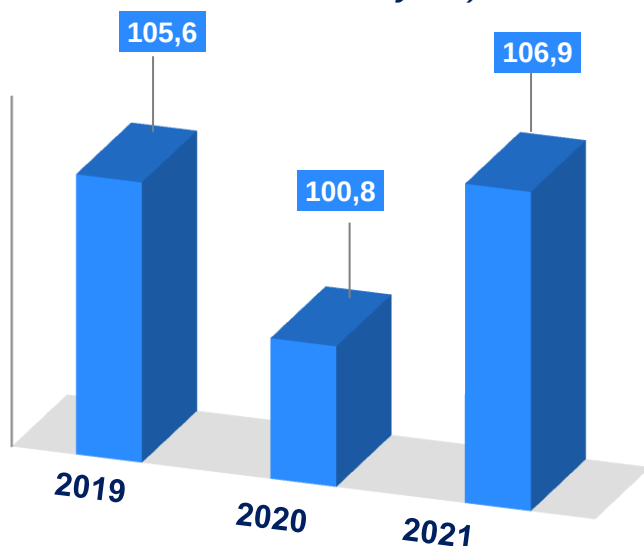

* Hereinafter, data for January-September 2019-2020. given with clarifications.

PRODUCTION OF GROSS DOMESTIC PRODUCT

GDP growth rates for January-September 2019-2021

(in% to the corresponding period of the last year)

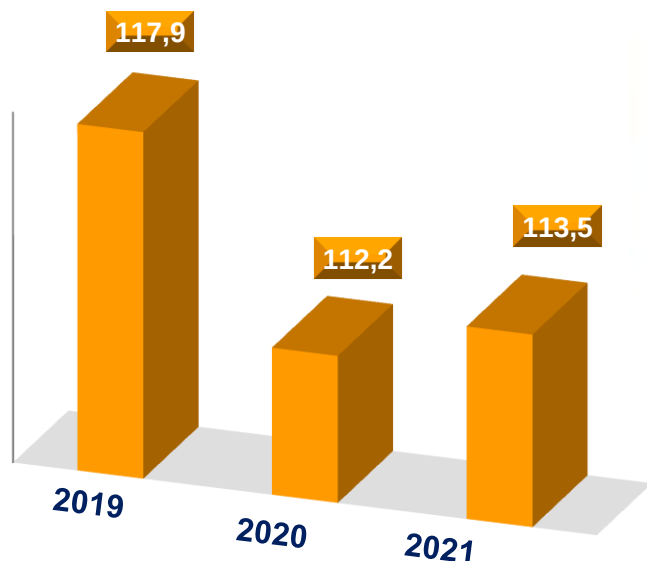

In January-September 2021, GDP growth accelerated to 6.9% against 0.8% in January-September 2020 and 5.6% in January-September 2019.

At the same time, an increase in the GDP deflator index to 113.5% was noted after 112.2% in January-September 2020 and 117.9% in the corresponding period of 2019.

GDP deflator index for January-September 2019-2021

(in% to the corresponding period of the last year)

PRODUCTION OF GROSS DOMESTIC PRODUCT

GDP is one of the most important indicators of the System of National Accounts, which characterizes the final result of the production activity of resident economic units, which is measured by the value of goods and services produced by these units for final use.

The volume index (real growth rates) of GDP is calculated as the ratio of the GDP of the reporting period, calculated in constant prices, i.e. in prices of the corresponding period of the last year (real GDP) to GDP in current prices of the corresponding period of the last year.

The GDP deflator index characterizes the average price change in the economy and is calculated as the ratio of nominal GDP (GDP of the reporting period in current prices) to real GDP.

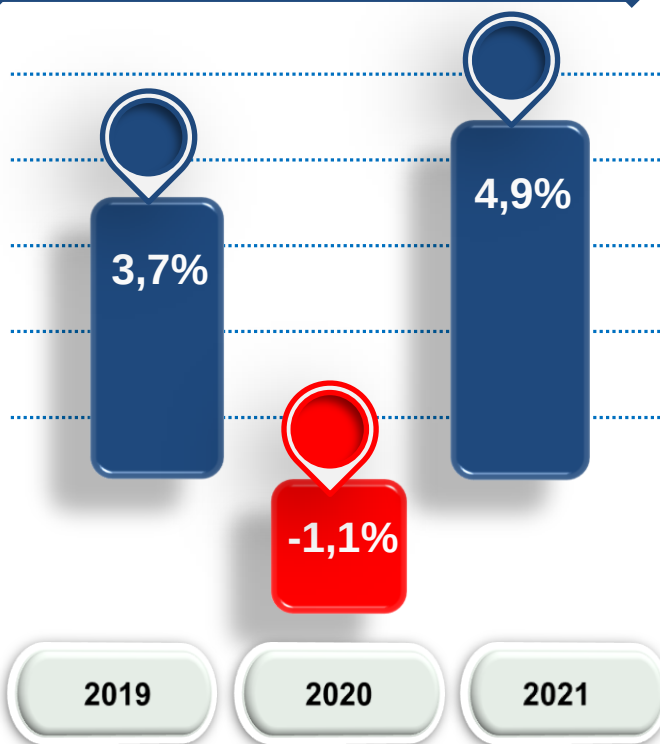

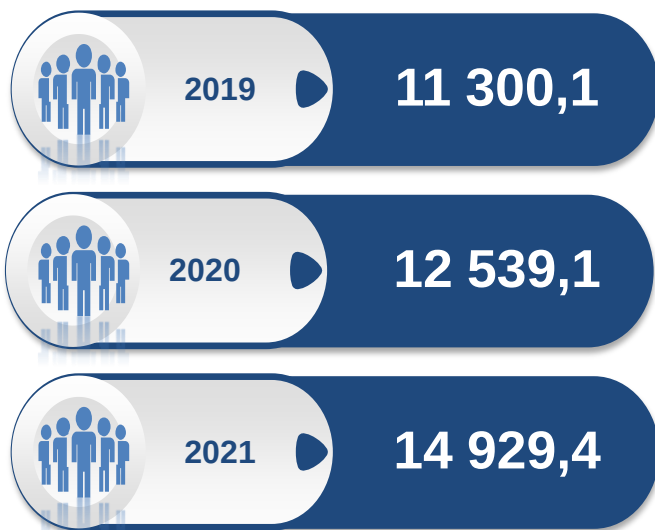

PRODUCTION OF GROSS DOMESTIC PRODUCT

As is clear from the diagram below, in January-September 2021, GDP per capita growth in real terms amounted to 4.9% against a decrease of 1.1% in January-September 2020 and an increase of 3.7% in January-September 2019.

Real growth rate of GDP per capita for January-September 2019-2021
(in% to the previous period last year)

GDP per capita for January-September 2019-2021
(at current prices, thousand soums)

For reference: GDP per capita is determined by dividing its total volume in current prices by the average population of the country for a certain period of time. The average resident population of the Republic of Uzbekistan was: in January-September 2019 - 33 490.2 thousand people, in January-September 2020 - 34 144.2 thousand people, in January-September 2021 - 34 819.0 thousand people.

PRODUCTION OF GROSS DOMESTIC PRODUCT

Sectoral structure of GDP for January-September 2021

(in% of total)

According to the results of January-September 2021, insignificant changes were noted in the sectoral structure of GDP. Thus, the share of agriculture, forestry and fisheries in the sectoral structure of GDP (GVA) increased from 26.3% to 26.9%, industry - from 26.9% to 27.6%, while the share of construction decreased from 6.9% to 6.8%, services - from 39.9% to 38.7%.

GROSS ADDED VALUE OF AGRICULTURE, FORESTRY AND FISHERIES

According to the results of January-September 2021, agriculture, forestry and fisheries showed positive growth rates at the level of 4.2%. The positive dynamics in this industry is due to an increase in livestock production by 2.8% (in January-September 2020 - an increase of 2.2%, in January-September 2019 - an increase of 2.6%) and crop production by 5.4% (in January-September 2020 - an increase of 3.1%, in January-September 2019 - an increase of 2.3%).

For information: according to preliminary data, in January-September 2021, the volume of production in physical terms amounted to:

	Name of products	Products volume	Growth rate, %
	Vegetables	7 803,8 thousand tons	103,3
	Fruits	2 070,7 thousand tons	100,9
	Corn	6 346,5 thousand tons	95,4
	Melon	1 436,7 thousand tons	103,8
	Grapes	1 313,7 thousand tons	105,1
	Potato	2 485,6 thousand tons	102,2
	Meat in live weight	1 888,3 thousand tons	103,0
	Milk	8 129,4 thousand tons	102,3
	Eggs	5 549,9 million pcs.	102,2
			

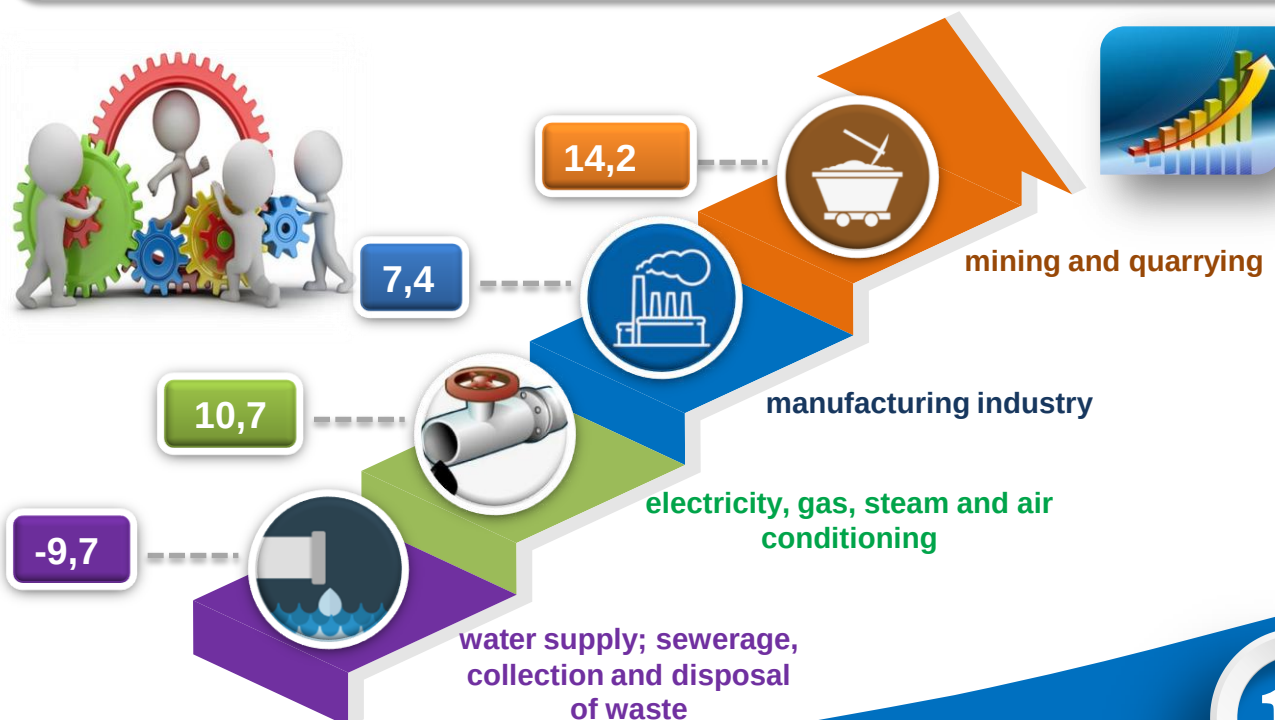

GROSS VALUE ADDED OF INDUSTRY

In the industry, there is an increase in value added by 9.0%. The positive dynamics in this industry is mainly due to an increase in the added value of the mining and quarrying industry by 14.2% (in January-September 2020 – a decrease by 26.8%, in January-September 2019 - an increase by 2.3%) and manufacturing industry by 7.4% (in January-September 2020 - by 4.9%, in January-September 2019 - by 6.1%). The electricity, gas, steam and air conditioning industry also showed positive growth of 10.7% versus growth of 13.8% in January-September 2020 and 5.1% in January-September 2019. In terms of the added value of water supply, sewerage, waste collection and disposal, a decrease of 9.7% was noted (in January-September 2020 – a decrease by 12.8%, in January-September 2019 - a decrease by 3.5%).

Growth rates of gross value added in industry in January-September 2021

(as% of the corresponding period of the last year)

GROSS VALUE ADDED OF INDUSTRY

Dynamics of the gross value added of industry in January-September 2019-2021

electricity, gas, steam and air conditioning	6 142,3	105,1	7 864,0	113,8	8 635,5	110,7
water supply, sewerage, waste collection and disposal	691,5	96,5	661,1	87,2	966,0	90,3

In the period under review, the share of manufacturing in the structure of value added in the industrial sector increased to 77.3% against 76.3% in January-September 2020. Accordingly, there was a decrease in the share of the mining industry and quarrying to 15.5% (in January-September 2020 - 15.7%).

GROSS VALUE ADDED OF INDUSTRY

Structure of gross value added in industry for January-September 2019-2021 (in% of the total)

At the end of January-September 2021, the largest share in the structure of value added in the manufacturing industry fell on the metallurgical and metalworking industry (except for machinery and equipment), which reached 41.6%.

The share of production of food, beverages and tobacco products amounted to 13.7%, textiles, clothing, leather and related products - 13.3%, rubber, plastic products and other non-metallic mineral products - 8.2%, chemical products - 7.5%, vehicles, trailers, semi-trailers and other transport equipment - 3.9%, computers, electronic and optical products - 2.3%, coke and petroleum products - 2.0% and other manufacturing products – 7.5 %.

2020
2021

GROSS VALUE ADDED OF THE TRADE INDUSTRY

In January-September 2021, the gross value added of the **service sector** amounted to 186 616.8 billion soums and, compared to the corresponding period of 2020, increased by 7.6%. Including trade services grew by 10.9%, accommodation and food - by 17.0%, transportation and storage - by 16.0%, information and communication - by 21.6%, other services - by 4.1%.

In January-September 2021, in the structure of gross value added of **trade**, the largest share fell on retail trade (excluding trade in motor vehicles) and amounted to 66.8% (in January-September 2020 - 68.6%, in January-September 2019 - 68.1%).

The share of wholesale trade (excluding trade in motor vehicles) amounted to 26.7% (in January-September 2020 - 25.6%, in January-September 2019 - 25.4%), wholesale and retail trade in motor vehicles and their repairs - 6.5% (in January-September 2020 - 5.8%, in January-September 2019 - 6.5%).

Dynamics of the structure of gross trade value added in January-September 2019-2021 (in% of the total)

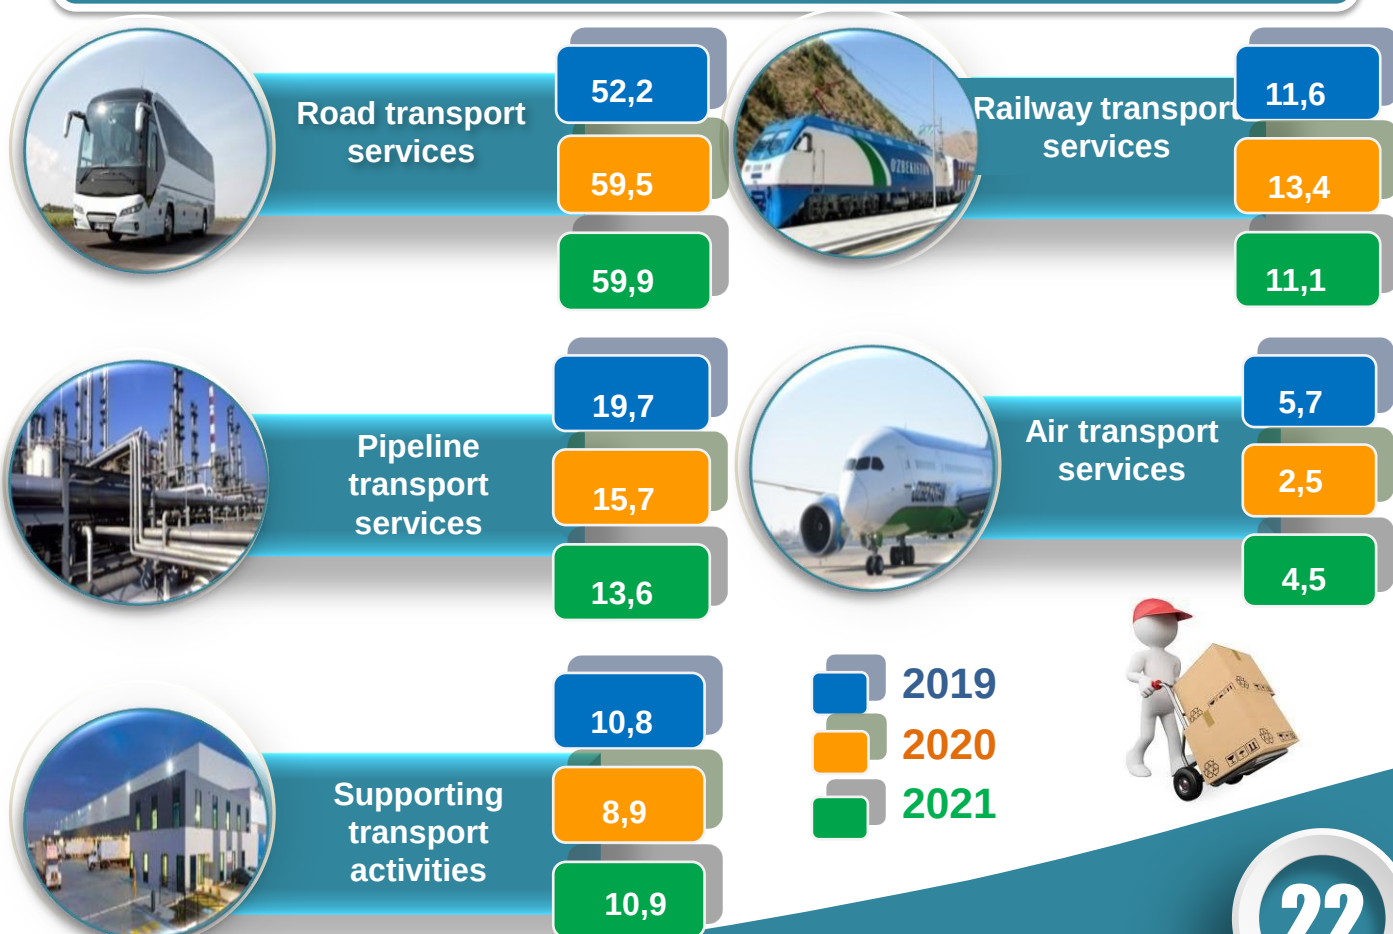

GROSS VALUE ADDED BY TRANSPORTATION AND STORAGE INDUSTRY

At the end of January-September 2021, the share of **transportation and storage** in the GDP of the Republic of Uzbekistan amounted to 5.4%. In the structure of gross value added in the transportation and storage industry, the largest share fell on road transport - 59.9% (in January-September 2020 - 59.5%, in January-September 2019 - 52.2%).

Pipeline transport amounted to 13.6% (in January-September 2020 - 15.7%, in January-September 2019 - 19.7%), railway transport - 11.1% (in January-September 2020 - 13.4%, in January-September 2019 - 11.6%), auxiliary transport activities - 10.9% (in January-September 2020 - 8.9%, in January-September 2019 - 10.8%), air transport - 4.5% (in January-September 2020 - 2.5%, in January-September 2019 - 5.7%) of the total value added of this industry.

Structure of gross added value of transportation and storage for January-September 2019-2021 (in% of the total)

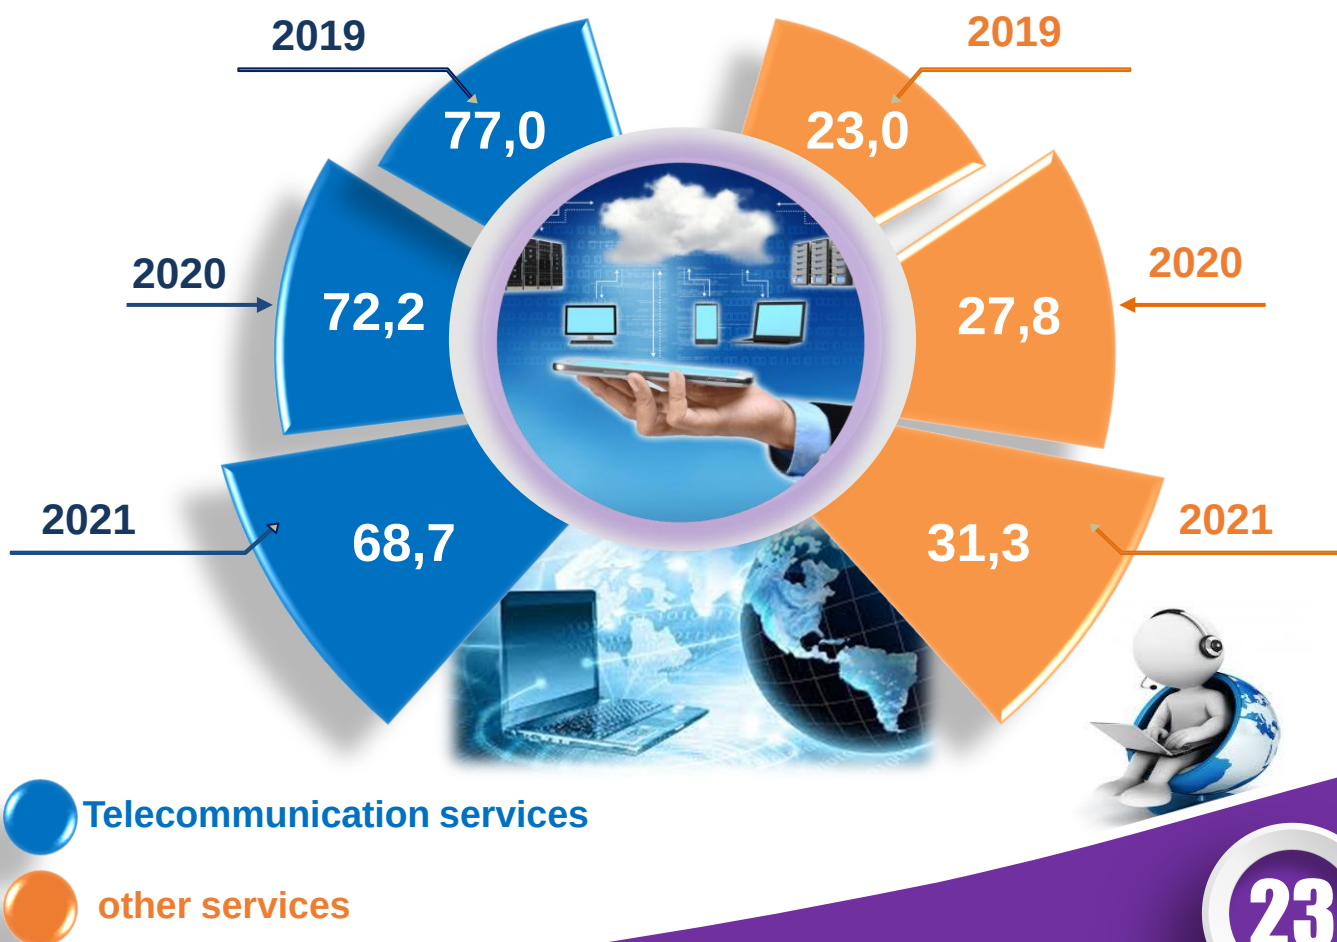

GROSS VALUE ADDED IN THE INFORMATION AND COMMUNICATIONS INDUSTRY

In January-September 2021, the share of information and communication in the country's economy amounted to 1.7% (in January-September 2020 - 1.7%). In the structure of value added in this industry, the main share fell on telecommunications services (wire and mobile communications, Internet, etc.) and amounted to 68.7% (in January-September 2020 - 72.2%). The remaining 31.3% of the added value (in January-September 2020 - 27.8%) created in this industry falls on other areas (publishing, computer programming, programming and broadcasting, etc.)

The structure of the gross value added of information and communication for January-September 2019-2021 *(in% of the total)*

GROSS VALUE ADDED OF SMALL BUSINESSES

In January-September 2021, small entrepreneurship (businesses) created added value in the amount of 268 334.3 billion soums, or 55.7% of the total value added in the economy. At the same time, the share of agriculture, forestry and fisheries in the total GVA of small entrepreneurship (business) amounted to 46.9%, industry - 11.1%, construction - 9.5% and services - 32.5%.

The share of small entrepreneurship (business) in GDP by type of economic activity for January-September 2021 (% of GVA)

For information: in January-September 2021, 76.5 thousand new small enterprises and microfirms were created in the republic (excluding dehkan and private farms). The largest number of them was created in trade (37.5%), industry (20.2%), agriculture, forestry and fisheries (12.4%), construction (6.7%), accommodation and food services (6.5%), information and communication (2.6%), transportation and storage (2.6%).

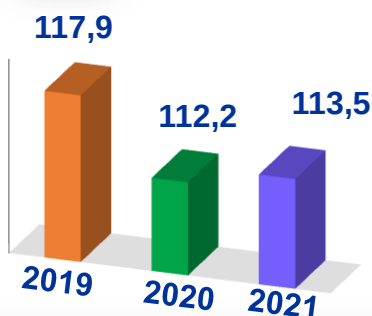

GROSS DOMESTIC PRODUCT INDEX DEFLATOR

In January-September 2021, the GDP deflator index amounted to 113.5% in relation to the prices of January-September 2020. The highest values of indices - deflators in the context of industries were noted in agriculture, forestry and fisheries - 119.1%, industry - 114.5% and construction - 114.5%. Indices - deflators are lower than, in general, for the economy (113.5%), were observed in transportation and storage, information and communications - 106.9%, trade, accommodation and food services - 113.3% and other service industries - 109.5%. At the same time, the index-deflator of net taxes on products amounted to 111.0%.
